

American National Standards Institute (ANSI). However, for convenience in compiling the lists, we use the designation of the standard developing organization (e.g., UL 1028) for the standard, as opposed to the ANSI designation (e.g., ANSI/UL 1028). Under our procedures, an NRTL recognized for an ANSI-approved test standard may use either the latest proprietary version of the test standard or the latest ANSI version of that standard, regardless of whether it is currently recognized for the proprietary or ANSI version. Contact ANSI or the ANSI web site (<http://www.ansi.org>) and click "NSSN" to find out whether or not a test standard is currently ANSI-approved.

Preliminary Finding on the Application

MET has submitted an acceptable request for expansion of its recognition as an NRTL. In connection with this request, OSHA did not perform an on-site review of MET's NRTL testing facilities. However, NRTL Program assessment staff reviewed information pertinent to the request and recommended that MET's recognition be expanded to include the additional test standards listed above (see Exhibit 25).

Following a review of the application file, the assessor's recommendation, and other pertinent documents, the NRTL Program staff has concluded that OSHA should grant to MET the expansion of recognition as an NRTL to use the additional test standards listed above. The staff, therefore, recommended to the Assistant Secretary that the application be preliminarily approved.

Based upon the recommendations of the staff, the Agency has made a preliminary finding that the MET Laboratories, Inc., can meet the requirements, as prescribed by 29 CFR 1910.7, for the expansion of recognition. This preliminary finding does not constitute an interim or temporary approval of the application.

OSHA welcomes public comments, in sufficient detail, as to whether MET has met the requirements of 29 CFR 1910.7 for expansion of its recognition as a Nationally Recognized Testing Laboratory. Your comment should consist of pertinent written documents and exhibits. To consider it, OSHA must receive the comment at the address provided above (see **ADDRESSES**) no later than the last date for comments (see **DATES** above). Should you need more time to comment, OSHA must receive your written request for extension at the address provided above (also see **ADDRESSES**) no later than the last date for comments (also see **DATES** above). You must include your reason(s) for any request for extension. OSHA will limit

an extension to 15 days unless the requester justifies a longer period. We may deny a request for extension if it is frivolous or otherwise unwarranted. You may obtain or review copies of MET's request, the recommendation on the expansion, and all submitted comments, as received, by contacting the Docket Office, Room N2625, Occupational Safety and Health Administration, U.S. Department of Labor, at the above address. You should refer to Docket No. NRTL-1-88, the permanent record of public information on MET's recognition.

The NRTL Program staff will review all timely comments, and after resolution of issues raised by these comments, will recommend whether to grant MET's expansion request. The Agency will make the final decision on granting the expansion, and in making this decision, may undertake other proceedings that are prescribed in Appendix A to 29 CFR Section 1910.7. OSHA will publish a public notice of this final decision in the **Federal Register**.

Signed at Washington, D.C. this 25th day of June, 2001.

R. Davis Layne,
Acting Assistant Secretary.

NUCLEAR REGULATORY COMMISSION

Biweekly Notice; Applications and Amendments to Facility Operating Licenses Involving No Significant Hazards Considerations

I. Background

Pursuant to Public Law 97-415, the U.S. Nuclear Regulatory Commission (the Commission or NRC staff) is publishing this regular biweekly notice. Public Law 97-415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued from June 18, 2001 through June 29, 2001. The last biweekly notice was published on June 27, 2001.
