

uncorrected, improper billing or other conduct may exacerbate fraud and abuse problems for a provider in the future.

Conclusion

Consultants who abuse their position of trust pose a risk to their provider clients, to the Federal health care programs, and to themselves. While most consultants are honest and provide valuable services to their clients, a small minority engage in questionable practices or promote abuse of the Federal health care programs. In general, if a consultant's advice seems too good to be true, it probably is. We urge providers to be vigilant and to exercise judgment when selecting and relying on consultants.
