Centers for Disease Control and Prevention

[Program Announcement 01150]

Expansion of Activities Supporting Coordination and Networking Among and Information Sharing and Networking Between Non-Governmental AIDS Service Organizations in the Republic of Zimbabwe; Notice of Availability of Funds

A. Purpose

The Centers for Disease Control and Prevention (CDC) announces the availability of fiscal year (FY) 2001 funds for a cooperative agreement to improve and expand coordination, networking, and information sharing activities between and among non-governmental AIDS service organizations (ASOs) in Zimbabwe.

The U.S. Government seeks to reduce the impact of HIV/AIDS and related conditions in specific countries within sub-Saharan Africa, Asia, and the Americas through a recently funded Global AIDS Initiative. Through this program, CDC has initiated its Global AIDS Program (GAP) to strengthen capacity and expand activities in the areas of (1) HIV primary prevention; (2) HIV care, support, and treatment; and (3) capacity and infrastructure development, especially for

surveillance. Targeted countries represent those with the most severe epidemics and the highest number of new infections. They also represent countries where the potential for impact is greatest and where U.S. Government agencies are already active. Zimbabwe is one of these targeted countries.

To carry out its activities in these countries, CDC is working in a collaborative manner with other U.S. Government agencies (e.g., USAID), national governments and other partners to develop programs of assistance to address the HIV/AIDS epidemic. CDC's program of technical assistance to Zimbabwe focuses on several areas including strengthening surveillance and laboratory measures, scaling up promising prevention and care strategies, supporting behavior change communication projects, promoting communication and technology transfer, and other capacity building efforts.

Zimbabwe is experiencing one of the world's most severe AIDS crises that looms as a disaster of unprecedented proportions. Zimbabwe has one of the world's highest HIV prevalence rates among adults, and the proportion of children orphaned by AIDS is expected to reach 35 percent by 2010.

Zimbabwe has taken many positive steps to address the AIDS epidemic. It was one of the first governments in the world to negotiate a large World Bank loan for AIDS prevention in 1992.

The national response has generated many examples of creative programming and successful grassroots initiatives in the face of staggering adversity. In December 1999, the Government of Zimbabwe (GOZ) declared AIDS a national disaster, created a new ministerial-level, multi-sectoral National AIDS Council (NAC), announced a new National AIDS Policy and instituted an "AIDS levy" payroll tax to underwrite improved national AIDS prevention and care services.

However, despite these and others interventions, the prevalence of HIV infection appears to have increased substantially in Zimbabwe from 1997 to 2000, and the epidemic cannot yet be characterized as having stabilized.

High prevalence rates among women 15-19 yrs of age suggests that recent infections continue to be high, including among youth. In addition, Zimbabwe is facing economic and political crises which compete for attention with and directly impact current responses to the AIDS epidemic.

The response to HIV/AIDS in Zimbabwe needs to be significantly strengthened in several areas. The Government of Zimbabwe, in its effort to lead the public sector response, needs

to strengthen three public health activities and programs in areas such as surveillance, laboratory systems and services and access to voluntary counseling and testing (VCT). The response on the part of civil society can be characterized as aggressive but poorly coordinated. Activities of Zimbabwean non-governmental AIDS service organizations (ASOs) span the spectrum from care, prevention, training, education and advocacy. Literally hundreds of organizations have programs of work at village, district, regional and national levels. However, to date there has been little coordination of effort among these organizations, few efforts to evaluate coverage or reduced duplication of services, inadequate efforts to evaluate and help address resource mobilization requirements and relatively little done to address information exchange/communication needs. Improvements in these facets of the response to HIV/AIDS on the part of civil society are major unmet needs in Zimbabwe.

The purpose of this cooperative agreement is therefore to improve and expand coordination, networking, and information sharing activities between and among non-governmental ASOs in Zimbabwe.

These collaborative activities could profoundly impact the scope, coordination and intensity of the implementation the National AIDS Policy, which calls for multi-sectoral action on many fronts. Cooperative efforts could lead to significant improvements in coordination of HIV/AIDS prevention and care activities in all provinces, increased capacity building of ASOs, resource mobilization activities targeting HIV/AIDS ASOs across Zimbabwe and strengthened ties between organizations within civil society and government HIV/AIDS and related programs.

B. Eligible Applicants

Applications may be submitted by public and private nonprofit organizations, non-governmental organizations with two years experience in HIV/AIDS, including facilitating information exchange and coordinating service activities between and among other non-governmental ASOs and relevant government agencies or other partner organizations in the majority of provinces of Zimbabwe.

C. Availability of Funds

Approximately \$300,000 is available in FY 2001 to fund this agreement. It is expected that the awards will begin on or about September 30, 2001 and will be made for a 12-month budget period
