AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the availability of documents that were developed as part of EPA's process for making pesticide tolerance reassessments consistent with the Federal Food, Drug, and Cosmetic Act (FFDCA), as amended by the Food Quality Protection Act of 1996 (FQPA). These documents are the human health risk assessment and related documents for lactofen (Cobra®). This notice also starts a 60-day public comment period

The Agency cautions that the risk assessment for lactofen is preliminary and that further refinements may be appropriate. Risk assessments reflect only the work and analysis conducted as of the time they were produced and it is appropriate that, as new information becomes available and/or additional analyses are performed, the conclusions they contain may change.

II. Background

A. What Action is the Agency Taking?

EPA is making available risk assessments that have been developed as part of the Agency's public participation process for making reregistration eligibility and tolerance reassessment decisions for the organophosphate and other pesticides consistent with FFDCa, as amended by FQPA. The Agency's human health risk assessment and other related documents for lactofen are available in the individual pesticide docket. As additional comments, reviews, and risk assessment modifications become available, these will also be docketed for lactofen.

The Agency cautions that the lactofen risk assessment is preliminary and that further refinements may be appropriate. Risk assessment documents reflect only the work and analysis conducted as of the time they were produced and it is appropriate that, as new information becomes available and/or additional analyses are performed, the conclusions they contain may change.

EPA is providing an opportunity, through this notice, for interested parties to provide written comments and input to the Agency on the risk assessment for the pesticide specified in this notice. Such comments and input could address, for example, the availability of additional data to further refine the risk assessment, such as percent crop treated information or submission of residue data from food processing studies, or could address the Agency's risk assessment methodologies and assumptions as applied to this specific chemical. Comments should be limited to issues raised within the risk assessment and associated documents. EPA will provide other opportunities for public comment on other science issues associated with the pesticide tolerance reassessment program. Failure to comment on any such issues as part of

this opportunity will in no way prejudice or limit a commenter's opportunity to participate fully in later notice and comment processes. All comments should be submitted by September 24, 2001 using the methods in Unit I. of the **SUPPLEMENTARY INFORMATION.** Comments will become part of the Agency record for lactofen.
