Species Covered in This Notice

The following species are covered in this notice:

Sea turtles

Threatened and endangered Green turtle (*Chelonia mydas*)

Endangered Hawksbill turtle (*Eretmochelys imbricata*)

Endangered Kemp's ridley turtle (*Lepidochelys kempi*)

Threatened Loggerhead turtle (*Caretta caretta*)

Permits, Modified Permits and Amended Permits Issued*Permit #1316*

Notice was published on May 21, 2001 (66 FR 27940), that Dr. Jeff Schmid, Conservancy of Southwest Florida applied for a scientific research permit (1316). The goal of this research is to characterize the essential habitat associations of subadult Kemp's ridley turtles in the nearshore waters of the upper Ten Thousand Islands. The objectives are: (1) to monitor the movements of Kemp's ridley turtles via radio and sonic telemetry and to quantify their habitat utilization from the geographical position data, (2) to produce a geographic information system (GIS) database of benthic habitats and subsequently map the habitat types within the study area, and (3) to test for habitat preferences of Kemp's ridley turtles in this region by comparing the amount of time a turtle spends in a given habitat relative to the availability of all other habitat types. Permit 1316 authorizes the non-lethal take of 20 Kemp's ridley turtle. After capture, the turtles will be handled, measured, flipper and PIT tagged, have a radio/sonic transmitter attached and be released near the capture site. Permit 1316 was issued on July 19, 2001, and expires July 31, 2006.

Permit #1299
