SUPPLEMENTARY INFORMATION:

I. Abstract

The surf clam/ocean quahog fishery is managed under an individual transferable quota system that sets both individual and overall harvest goals. In order to aid in the enforcement of these quotas, fishermen are generally required to land unshucked surf clams and ocean quahogs in 32-bushel cages. Because of potential pollution problems with this practice, fishermen can shuck at sea if they obtain an authorization to do so from NOAA. NOAA will only authorize the action if a NOAA-approved observer is carried on the vessel to certify the amount of unshucked shellfish harvested. This is required because of the difficulty in converted shucked weights into bushels.

II. Method of Collection

A paper form is submitted.
