NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-277 and 50-278]

Exelon Generation Company, LLC; Peach Bottom Atomic Power Station, Unit Nos. 2 and 3 Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of an exemption from Title 10 of the Code of Federal Regulations (10 CFR) part 50, section 71(e)(4) to Facility Operating License Nos. DPR-44 and DPR-56, issued to Exelon Generation Company, LLC, (the licensee), for operation of the Peach Bottom Atomic Power Station (PBAPS), Unit Nos. 2 and 3, located in York County, Pennsylvania.

Environmental Assessment

Identification of the Proposed Action

The proposed action would exempt the licensee from some requirements of 10 CFR 50.71(e)(4) regarding submission of revisions to the Updated Final Safety Analysis Report (UFSAR). The proposed exemption would allow updates to the combined UFSAR for PBAPS, Unit Nos. 2 and 3, to be submitted within 6 months following completion of each PBAPS Unit 2 refueling outage, not to exceed 24 months from the previous submittal.

The proposed action is in accordance with the licensee's application for exemption dated May 30, 2001.

The Need for the Proposed Action

10 CFR 50.71(e)(4), requires licensees to submit updates to their UFSAR annually or within 6 months after each refueling outage provided that the interval between successive updates does not exceed 24 months. Since Units 2 and 3 share a common UFSAR, the licensee must update the same document annually or within 6 months after a refueling outage for either unit. The last change to 10 CFR 50.71(e)(4) was published in the **Federal Register** (57 FR 39358) on August 31, 1992, and became effective on October 1, 1992. The underlying purpose of the rule change was to relieve licensees of the burden of filing annual UFSAR revisions while assuring that such revisions are made at least every 24 months. However, as written, the burden reduction can only be realized by single-unit facilities, or multiple-unit facilities that maintain separate UFSARs for each unit. In the Summary and Analysis of Public Comments accompanying the 10 CFR 50.71(e)(4)
