Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order with Natural Organics, Inc. and Gerald A. Kessler, the principal who controlled this corporation (referred to collectively as "Respondents"). The agreement would settle a complain by the Federal Trade Commission that Respondents engaged in unfair or deceptive acts or practices in violation of sections 5 and 12 of the Federal Trade Commission Act.

The proposed consent order has been placed on the public record for thirty (30) days for reception of comments by interested persons. Comments received during this period will become part of

the public record. After thirty (30) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

This matter concerns advertising representations made about Pedi-Active A.D.D., a dietary supplement. The administrative complain alleged that Respondents violated the FTC Act by disseminating advertisements that made unsubstantiated efficacy claims about the ability of Pedi-Active A.D.D. to treat Attention Deficit Hyperactivity Disorder ("ADHD") or certain symptoms of that disorder. Specifically, the complaint alleged that Respondents made unsubstantiated claims that Pedi-Active A.D.D. will: (1) Improve the attention span of children who have difficulty focusing on school work; (2) improve the scholastic performance of children who have difficulty focusing on school work; (3) improve the attention span of children who suffer from ADHD; (4) improve the scholastic performance of children who suffer from ADHD; and (5) treat or mitigate ADHD or its symptoms.

The proposed consent order contains provisions designed to prevent Respondents from engaging in acts and practices similar to those alleged in the complain in the future. Part I of the proposed consent order prohibits Respondents from claiming that Pedi-Active A.D.D. or any other food, drug, or dietary supplement (1) will improve the attention span of children who have difficulty focusing on school work, (2) will improve the scholastic performance of children who have difficulty focusing on school work, (3) will improve the attention span of children who suffer from ADHD, (4) will improve the scholastic performance of children who suffer from ADHD, or (5) can treat or mitigate ADHD in children, unless they possess competent and reliable scientific evidence substantiating the claim. In addition, Part II of the proposed consent order requires Respondents to possess competent and reliable scientific
