III. Cancellation Order

Pursuant to section 6(f)(1)(A) of FIFRA, EPA is approving the requested registration cancellations. Accordingly, the Agency orders that the registrations identified in Table 1, are hereby canceled. Any distribution, sale, or use of existing stocks of the products identified in Table 1, in a manner inconsistent with the terms of this Order or the Existing Stock Provisions in Unit IV of this **Federal Register** notice will be considered a violation of section 12(a)(2)(K) of FIFRA and/or section 12(a)(1)(A) of FIFRA.

IV. Existing Stocks Provisions

For purposes of this Order, the term “existing stocks” is defined, pursuant to EPA’s existing stocks policy June 26, 1991 (56 FR 29362) (FRL–3846–4), as those stocks of a registered pesticide product which are currently in the United States and which have been packaged, labeled, and released for shipment prior to the effective date of cancellation.

A. Distribution or Sale by the Registrant

The distribution or sale of existing stocks by registrants will not be lawful under FIFRA after August 8, 2001, except for the purposes of returns and relabeling, shipping such stocks for export consistent with the requirements of section 17 of FIFRA, or for proper disposal.

B. Distribution and Sale by Other Persons

Sale or distribution by any person of existing stocks of any products identified in Table 1, will not be lawful under FIFRA after December 31, 2002.

V. Notification of Intent to Revoke Tolerances

This notice also serves as an advance notification that the Agency intends to revoke the related tolerances, for the cancelled registrations listed in this notice, unless there is a request from the public to support the tolerances for import purposes. EPA believes that the end use of any remaining existing stocks of these products will likely end in 2003 given that production of technical product by the registrant ceased around April 2001 and that sale and distribution of benomyl products will end on December 31, 2002. EPA will determine how long treated food containing residues of benomyl could remain in the channels of trade assuming that the last treatment occurred on December 31, 2003, and will set the expiration date accordingly.

It is EPA’s general practice to propose revocation of tolerances for residues of pesticide active ingredients for which FIFRA registrations no longer exist, to protect the food supply of the U.S. and to discourage the misuse of pesticides within the United States. In many cases the cancellation of a food use in the U.S. indicates that there are insufficient domestic residue data or other information to support the continuation of the tolerance and an uncertain amount of relevant data concerning residues on imported food. In the absence of relevant data, EPA is unable to make a safety finding regarding the treated food entering the U.S. Upon request, EPA will provide interested parties with its import tolerance policy and data requirements, explaining how an interested party should go about seeking to retain a tolerance for import purposes.
