

weight-averaging such rates, the SAA, at 873, provides that we may use other reasonable methods. Because the petition contained only an estimated price-to-price dumping margin, which the Department adjusted for purposes of initiation, there are no additional estimated margins available with which to create the "all others" rate. Therefore, we applied the published margin of 49.86 percent as the "all others" rate.

Suspension of Liquidation

In accordance with section 733(d) of the Act, we are directing Customs to suspend liquidation of all entries of welded large diameter line pipe from Mexico that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. We will instruct Customs to require a cash deposit or the posting of a bond equal to the amount by which the NV exceeds the EP, as indicated below. These suspension-of-liquidation instructions will remain in effect until further notice. The dumping margins are as follows:

Producer/exporter	Margin (percent)
PMT-Tubacero	49.86
All Others	49.86

ITC Notification

In accordance with section 733(f) of the Act, we have notified the ITC of our determination. If our final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination, or 45 days after our final determination, whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

Public Comment

Case briefs must be submitted no later than 50 days after the publication of this notice in the **Federal Register**. Rebuttal briefs must be filed within five days after the deadline for submission of case briefs. A list of authorities used, a table of contents, and an executive summary of issues should accompany any briefs submitted to the Department. Executive summaries should be limited to five pages total, including footnotes. Public versions of all comments and rebuttals should be provided to the Department and made available on diskette. Section 774 of the Act provides that the Department will hold a hearing to afford interested parties an opportunity to comment on arguments raised in case or rebuttal briefs, provided that such a hearing is requested by any interested party. If a request for a hearing is made

in an investigation, the hearing will tentatively be scheduled for two days after the deadline for submission of the rebuttal briefs, at the U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230. In the event that the Department receives requests for hearings from parties to more than one large diameter line pipe case, the Department may schedule a single hearing to encompass all cases. Parties should confirm by telephone the time, date, and place of the hearing 48 hours before the scheduled time.

Interested parties who wish to request a hearing, or to participate if one is requested, must submit a written request within 30 days of the publication of this notice. Requests should specify the number of participants and provide a list of the issues to be discussed. Oral presentations will be limited to issues raised in the briefs.

If this investigation proceeds normally, we will make our final determination in this investigation no later than 75 days after the date of this preliminary determination.

This determination is published pursuant to sections 733(f) and 777(i)(1) of the Act.

Dated: August 8, 2001.

Faryar Shirzad,

Assistant Secretary for Import Administration.

DEPARTMENT OF COMMERCE

International Trade Administration

North American Free-Trade Agreement, Article 1904 NAFTA Panel Reviews; Request for Panel Review

AGENCY: NAFTA Secretariat, United States Section, International Trade Administration, Department of Commerce.

ACTION: Notice of first request for panel review.

SUMMARY: On August 9, 2001, Tubos de Acero de Mexico, S.A. ("TAMSA") filed a First Request for Panel Review with the United States Section of the NAFTA Secretariat pursuant to Article 1904 of the North American Free Trade Agreement. Panel review was requested of the full sunset review of the antidumping duty order, respecting Oil Country Tubular Goods from Mexico. This determination was published in the **Federal Register** (66 FR 35997) on July 10, 2001. The NAFTA Secretariat

has assigned Case Number USA-MEX-2001-1904-06 to this request.

FOR FURTHER INFORMATION CONTACT:

Caratina L. Alston, United States Secretary, NAFTA Secretariat, Suite 2061, 14th and Constitution Avenue, Washington, DC 20230, (202) 482-5438.

SUPPLEMENTARY INFORMATION: Chapter 19 of the North American Free-Trade Agreement ("Agreement") establishes a mechanism to replace domestic judicial review of final determinations in antidumping and countervailing duty cases involving imports from a NAFTA country with review by independent binational panels. When a Request for Panel Review is filed, a panel is established to act in place of national courts to review expeditiously the final determination to determine whether it conforms with the antidumping or countervailing duty law of the country that made the determination.

Under Article 1904 of the Agreement, which came into force on January 1, 1994, the Government of the United States, the Government of Canada and the Government of Mexico established *Rules of Procedure for Article 1904 Binational Panel Reviews* ("Rules"). These Rules were published in the **Federal Register** on February 23, 1994 (59 FR 8686).

A first Request for Panel Review was filed with the United States Section of the NAFTA Secretariat, pursuant to Article 1904 of the Agreement, on August 9, 2001, requesting panel review of the five-year sunset review of the antidumping duty order described above.

The Rules provide that:

(a) A Party or interested person may challenge the final determination in whole or in part by filing a Complaint in accordance with Rule 39 within 30 days after the filing of the first Request for Panel Review (the deadline for filing a Complaint is September 10, 2001);

(b) A Party, investigating authority or interested person that does not file a Complaint but that intends to appear in support of any reviewable portion of the final determination may participate in the panel review by filing a Notice of Appearance in accordance with Rule 40 within 45 days after the filing of the first Request for Panel Review (the deadline for filing a Notice of Appearance is September 24, 2001); and

(c) The panel review shall be limited to the allegations of error of fact or law, including the jurisdiction of the investigating authority, that are set out in the Complaints filed in the panel review and the procedural and substantive defenses raised in the panel review.

Dated: August 10, 2001.

Caratina L. Alston,

United States Secretary, NAFTA Secretariat.

BILLING CODE 3510-GT-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 081001C]

Receipt of an Application for an Incidental Take Permit (1348).

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability.

SUMMARY: NMFS has received an application for an incidental take permit (Permit) from the North Carolina Division of Marine Fisheries (NCDMF) pursuant to the Endangered Species Act of 1973, as amended (ESA). As required by the ESA, NCDMF's application includes a conservation plan designed to minimize and mitigate any such take of endangered or threatened species. The Permit application is for the incidental take of ESA-listed adult and juvenile sea turtles associated with otherwise lawful commercial fall gillnet fisheries for flounder in the southeastern portion of Pamlico Sound in the state of North Carolina. The duration of the proposed Permit is for 1 year. NMFS is furnishing this notice in order to allow other agencies and the public an opportunity to review and comment on this document. All comments received will become part of the public record and will be available for review pursuant to the ESA.

DATES: Written comments from interested parties on the Permit application and Plan must be received at the appropriate address or fax number (see **ADDRESSES**) no later than 5 pm Eastern daylight time on September 14, 2001.

ADDRESSES: Written comments on this action should be addressed to the Chief, Endangered Species Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Silver Spring, MD 20910. Comments may also be sent via fax to 301-713-0376. The application is available for download and review at <http://www.nmfs.noaa.gov/prot-res/PR3/Permits/ESAPermit.html>. Comments will not be accepted if submitted via e-mail or the Internet.

FOR FURTHER INFORMATION CONTACT: David Bernhart (ph. 727-570-5312, fax

727-570-5517, e-mail David.Bernhart@noaa.gov). Comments received will also be available for public inspection, by appointment, during normal business hours by calling 301-713-1401.

SUPPLEMENTARY INFORMATION: Section 9 of the ESA and Federal regulations prohibit the "taking" of a species listed as endangered or threatened. The term "take" is defined under the ESA to mean harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct. NMFS may issue permits, under limited circumstances, to take listed species incidental to, and not the purpose of, otherwise lawful activities. NMFS regulations governing permits for threatened and endangered species are promulgated at 50 CFR 222.307.

Species Covered in this Notice

The following species are included in the Plan and Permit application: Loggerhead (*Caretta caretta*), green (*Chelonia mydas*), leatherback (*Dermochelys coriacea*), hawksbill (*Eretmochelys imbricata*), and Kemp's ridley (*Lepidochelys kempii*) sea turtles.

Background

On August 8, 2001, NCDMF submitted an application to NMFS for an ESA section 10 (a)(1)(B) permit for an incidental take of ESA-listed sea turtles associated with commercial fall gillnet fisheries for flounder in the southeastern portion of Pamlico Sound. This application includes endangered Kemp's ridley, leatherback, and hawksbill sea turtles and the threatened green and loggerhead sea turtles. This fishery targets flounder. The proposed implementation of this fishery will allow for the continued commercial harvest of this species. This fishery is estimated to have a value of over one million dollars per year. This fishery supports fishermen and the local economy.

Conservation Plan

The Conservation Plan prepared by NCDMF describes measures designed to monitor, minimize, and mitigate the incidental takes of ESA-listed sea turtles, focusing on the following fishery:

Fall Gillnet Flounder Fishery

This fishery is scheduled to occur from September 15 through December 15, 2001. The fall flounder gillnet fishery in Pamlico Sound occurs predominantly in an area lying south of a line running westerly from a point on Hatteras Island, Dare County (35° 23' 00" N - 75° 30' 00" W) through the Avon

Channel Entrance Beacon No. 1 (35° 23' 00" N - 75° 33' 38" W) thence westerly to Bensons Point (3° 23' 00" N - 76° 03' 42" W) at Wysocking Bay, Hyde County and east of a line running southerly from Bensons Point along the eastern edge of Bluff Shoal to the west side of Ocracoke Inlet, Carteret County (35° 03' 42" N - 76° 02' 12" W) thence running easterly and northerly along the shoreline of the Pamlico Sound back to the point of beginning. This area is referred to as the Gillnet Restricted Area (GRA). Flounder gillnets are set in the GRA from mid-September through mid-December in waters ranging between 10 and 20 feet (3.1 m to 6.2 m) deep to target flounder migrating from the estuaries to offshore spawning grounds. Pamlico Sound flounder gillnets are normally hung with 5 and one-half to 6 and one-half inch (14 cm to 16.5 cm) mesh monofilament webbing, and fisherman routinely set from 2,000 to 10,000 (1,828 m to 9,140 m) yards of net at a time. Telephone interviews by NCDMF staff with flounder gillnet fishermen (n=31) indicate that in 1999 the average amount of 5 inch and larger mesh gillnet set per fishing operation was 4,750 yards (4,342 m). Many of the flounder gillnet fishermen use net reels to set and retrieve their gear. The nets are approximately 10 feet (3.1 m) deep, however many fishermen use tiedowns which restrict the nets to the bottom three to four feet (of the water column. The nets are constructed of small diameter webbing that is hung loosely to create excess bag in the net which improves the catch of flounder. Flounder gillnets are normally fished every day or every other day depending on recent catches and weather conditions. Soak times generally range between 12 and 48 hours. It is estimated that in the fall of 1999, between 90 and 95 vessels participated in the large mesh and small mesh gillnet fisheries in the Pamlico Sound. Approximately one-half of these vessels are believed to have fished large mesh gillnets. NCDMF Trip Ticket Program information for 1999 indicates that 45 vessels greater than 25 feet (7.6 m) in length and nine vessels less than 25 feet (7.6 m) in length landed more than 1,000 pounds (453.1 kg) of flounder per month from September through December.

Incidental mortalities of ESA-listed sea turtles associated with the commercial fall gillnet fishery for flounder in Pamlico Sound, North Carolina are requested at levels specified in the Permit application. NCDMF is proposing to limit the commercial fall gillnet fishery for flounder such that the incidental
