Background

The Commission instituted this investigation following receipt on May 15, 1992 of a request from the USTR. The request asked that the Commission conduct an investigation assessing the quantitative economic effects of significant U.S. import restraints on the U.S. economy, and prepare periodic update reports following the submission of the first report. The first report was delivered to the USTR in November 1993, the first update in December 1995, and the second update in May 1999. In this third update report, the Commission will assess the economic effects of significant tariff and non-tariff U.S. import restraints on U.S. consumers, on the activities of U.S. firms, on the income and employment of U.S. workers, and on the net economic welfare of the United States. The assessment will not include import

restraints resulting from final antidumping or countervailing duty investigations, section 337, 201, and 406 investigations, or section 301 actions.

The initial notice of institution of this investigation was published in the **Federal Register** of June 17, 1992 (57 FR 27063).
