

the State, which includes the Catawba Indian Nation, and therefore is not authorized to carry out its hazardous waste program in Indian Country within the State. As a result, this action has no effect on Indian Country. EPA will continue to implement and administer the RCRA program in these lands.

K. What Is Codification and Is EPA Codifying South Carolina's Hazardous Waste Program as Authorized in This Rule?

Codification is the process of placing the State's statutes and regulations that comprise the State's authorized hazardous waste program into the Code of Federal Regulations. We do this by referencing the authorized State rules in 40 CFR part 272. We reserve the amendment of 40 CFR part 272, subpart PP for this authorization of South Carolina's program until a later date.

L. Administrative Requirements

The Office of Management and Budget has exempted this action from the requirements of Executive Order 12866 (58 FR 51735, October 4, 1993), and therefore this action is not subject to review by OMB. This action authorizes State requirements for the purpose of RCRA 3006 and imposes no additional requirements beyond those imposed by State law. Accordingly, I certify that this action will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). Because this action authorizes pre-existing requirements under State law and does not impose any additional enforceable duty beyond that required by State law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law, 104-4). For the same reason, this action does not have tribal implications within the meaning of Executive Order 13175 (65 FR 67249, November 6, 2000). It does not have substantial direct effects on tribal governments, on the relationship between the Federal government and the Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes, as specified in Executive Order 13175. This action will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 131,132 (64 FR 43255, August 10, 1999), because it merely authorizes State requirements as part of

the State RCRA hazardous waste program without altering the relationship or the distribution of power and responsibilities established by RCRA. This action also is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997), because it is not economically significant and it does not make decisions based on environmental health or safety risks. This rule is not subject to Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355 (May 22, 2001)) because it is not a significant regulatory action under Executive Order 12866.

Under RCRA 3006(b), EPA grants a State's application for authorization as long as the State meets the criteria required by RCRA. It would thus be inconsistent with applicable law for EPA, when it reviews a State authorization, to require the use of any particular voluntary consensus standard in place of another standard that otherwise satisfies the requirements of RCRA. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. As required by section 3 of Executive Order 12988 (61 F.R. 4729, February 7, 1996), in issuing this rule, EPA has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct. EPA has complied with Executive Order 12630 (53 F.R. 8859, March 15, 1988) by examining the takings implications of the rule in accordance with the "Attorney General's Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings" issued under the executive order. This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.).

The Congressional Review Act, 5 U.S.C. 801 et seq., as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this document and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal**

Register. This action is not a "major rule" as defined by 5 U.S.C. 804(2). This action will be effective October 22, 2001.

List of Subjects in 40 CFR Part 271

Environmental protection, Administrative practice and procedure, Confidential business information, Hazardous waste, Hazardous waste transportation, Indian lands, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements.

Authority: This action is issued under the authority of sections 2002(a), 3006 and 7004(b) of the Solid Waste Disposal Act as amended 42 U.S.C. 6912(a), 6926, 6974(b).

Dated: May 12, 2001.

A. Stanley Meiburg,

Acting Regional Administrator, Region IV.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 300

[FRL-7034-9]

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List

AGENCY: Environmental Protection Agency.

ACTION: Direct final deletion of the V&M/Albaladejo Superfund Site from the National Priorities List.

SUMMARY: The Environmental Protection Agency (EPA), Region II, announces the deletion of the V&M/Albaladejo Superfund Site (Site), located in the Almirante Norte Ward of the municipality of Vega Baja, Puerto Rico, from the National Priorities List (NPL) and requests public comment on this action.

The NPL is Appendix B of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), 40 CFR part 300, which EPA promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended. This Direct Final Notice of Deletion is being published by EPA with the concurrence of the Commonwealth of Puerto Rico, through the Puerto Rico Environmental Quality Board (EQB). EPA and EQB have determined that all appropriate response actions under CERCLA have been completed and, therefore, no further cleanup pursuant to CERCLA is appropriate. Moreover, EPA and EQB have determined that the

Site poses no significant threat to public health or the environment.

DATES: This direct final deletion will be effective October 22, 2001 unless EPA receives significant adverse comments by September 20, 2001. If significant adverse comments are received, EPA will publish a timely withdrawal of the direct final deletion in the **Federal Register**, informing the public that the deletion will not take effect.

ADDRESSES: Comments may be mailed to: Caroline Kwan, Remedial Project Manager, Emergency and Remedial Response Division, U.S. Environmental Protection Agency, Region II, 290 Broadway, 20th Floor, New York, New York 10007-1866.

Information Repositories

Comprehensive information about the Site is available for viewing and copying at the Site information repositories located at:

U.S. Environmental Protection Agency, Region II, Superfund Records Center, 290 Broadway, Room 1828, New York, New York 10007-1866, (212) 637-4308, Hours: 9 a.m. to 5 p.m., Monday through Friday; and,

Vega Baja City Hall, Corner of Jose Francisco Nater and Betances Streets, P.O. Box 4555, Vega Baja, Puerto Rico 00693, (787) 855-2500/2515, Hours: 9 a.m. to 4:30 p.m., Monday through Friday; and,

FOR FURTHER INFORMATION CONTACT: Ms. Caroline Kwan, Remedial Project Manager, U.S. EPA Region II, 290 Broadway, 20th Floor, New York, New York 10007-1866, (212) 637-4275; Fax Number (212) 637-4284; email address: Kwan.Caroline@EPA.GOV.

SUPPLEMENTARY INFORMATION:

Table of Contents

- I. Introduction
- II. NPL Deletion Criteria
- III. Deletion Procedures
- IV. Basis for Site Deletion

I. Introduction

EPA Region II announces the deletion of the V&M/Albaladejo Superfund Site from the NPL. The EPA maintains the NPL as the list of those sites that appear to present a significant risk to public health or the environment. Sites on the NPL can have remedial actions financed by the Hazardous Substances Superfund Response Trust Fund. As described in Section 300.425(e)(3) of the NCP, a site deleted from the NPL remains eligible for remedial actions if conditions at the site warrant such action.

EPA considers this action to be noncontroversial and routine, and therefore, EPA is taking it without prior publication of a Notice of Intent to Delete. This action will be effective October 22, 2001 unless EPA receives significant adverse comments by September 20, 2001 on this action. If significant adverse comments are received within the 30-day public comment period of this action, EPA will publish a timely withdrawal of this Direct Final Deletion before the effective date of the deletion and the deletion will not take effect. EPA will, if appropriate, prepare a response to comments and continue with the deletion process on the basis of the Notice Intent to Delete and the comments already received. There will be no additional opportunity to comment.

Section II explains the criteria for deleting sites from the NPL. Section III discusses procedures that EPA is using for this action. Section IV discusses the V&M/Albaladejo Superfund Site and demonstrates how it meets the deletion criteria.

II. NPL Deletion Criteria

Section 300.425(e) of the NCP provides that Sites may be deleted from the NPL where no further response is appropriate. In making this determination, EPA, in consultation with the Commonwealth, shall consider whether any of the following criteria have been met:

- i. Responsible parties or other parties have implemented all appropriate response actions required; or,
- ii. All appropriate Fund-financed responses under CERCLA have been implemented, and no further action by responsible parties is appropriate; or
- iii. The remedial investigation has shown that the release poses no significant threat to public health or the environment and, therefore, implementing remedial measures is not appropriate.

EPA will not conduct any further reviews of this Site because EPA

believes that this Site is suitable for unlimited use and unrestricted exposure. If new information becomes available which indicates a need for further action, EPA may initiate such actions based upon § 300.425(e)(3) of the NCP.

III. Deletion Procedures

The following procedures apply to deletion of the Site.

(1) From January 1998 to June 1998, EPA conducted a removal action at the Site.

(2) EPA conducted confirmatory sampling and a remedial investigation to determine the extent of the contamination of soil and groundwater at the Site.

(3) On September 29, 2000, EPA issued a Record of Decision which selected a no further action remedy for the Site. EPA also issued a Final Close Out report on September 29, 2000 which summarized the actions taken at the Site.

(4) The EPA consulted with the Commonwealth of Puerto Rico Environmental Quality Board on the deletion of the Site from the NPL prior to developing this Direct Final Deletion.

(5) The Commonwealth of Puerto Rico concurred with the deletion of the Site from the NPL on November 3, 2000.

(6) Concurrently with the publication of this Direct Final Deletion, a parallel Notice of Intent to Delete has been published today in the Notice section of the **Federal Register**. Notices are also being published in local newspapers and appropriate notice is being provided to federal, state, and local government officials and other interested parties.

(7) The EPA placed copies of documents supporting the deletion in the Site information repositories identified above.

(8) If no significant adverse comments are received, the Site will be deleted. If significant adverse comments are received within the 30-day public comment period on this action or the Notice of Intent to Delete published in today's **Federal Register**, EPA will publish a timely notice of withdrawal of this Direct Final Deletion before its effective date. EPA will prepare, if appropriate, a response to comments and continue with the deletion process on the basis of the notice of Intent to Delete and the comments already received.

Deletion of a site from the NPL does not itself create, alter, or revoke any individual's rights or obligations. Deletion of a site from the NPL does not in any way alter EPA's right to take enforcement actions, as appropriate.

The NPL is designed primarily for informational purposes and to assist EPA management.

IV. Basis for Site Deletion

The V&M/Albaladejo Site is located off State Road No. 160, Kilometer 4.2 in the Almirante Norte Ward of the municipality of Vega Baja, Puerto Rico. It is reached via a dirt road extending about one mile west from Route 160. The exact Site acreage is unknown but generally consists of two farms, the V&M property and the Albaladejo Farm. The area is rural and characterized by rugged, heavily-vegetated, hilly terrain with small farms located in the valleys. The region is sparsely populated within a one-mile radius of the Site. Fewer than 100 residents are estimated to live within one-quarter mile of the Site.

The Site was used for burning and/or dumping of plastic-coated electric cables, electrical equipment, and car batteries. Wire and other materials were burned to recover the copper, aluminum, and lead contained therein. No containment (i.e., berm, liner) system is known to have been used nor has any been observed. It is not known when the burning activity began at the Site. One of the farm owners reported that trucks had been entering the Site carrying wastes since 1985. Burning reportedly ceased on the V&M property in 1986 when it was purchased by its current owner, but continued on the Albaladejo Farm into 1988. The total quantity of waste disposed and burned at the Site is unknown. Four historical waste disposal/burn areas were identified.

In August 1988, the Puerto Rico Environmental Quality Board (EQB) conducted a preliminary assessment at the Site. In January 1989, EPA conducted a site investigation which found elevated levels of copper and antimony in surface soil samples at the Site.

In June 1996, the V&M Site was proposed to the National Priorities List (NPL), with the final listing on December 26, 1996.

A time-critical removal action was conducted from January through June 1998. Based on previous sampling information, contaminated soils were excavated from the four zones. In total, approximately 5,565 cubic yards of contaminated soils were excavated, stockpiled, and stabilized on-Site in a designated area prior to their removal and proper off-Site disposal. The removal action was completed in June 1998.

Confirmatory testing of burn area soils after the excavation of contaminated soils indicated that the concentrations

of lead generally had been reduced to below an average concentration of 400 ppm, a level EPA has determined to be protective of children in a residential environment.

Between March and November, 1998, EPA collected four rounds of groundwater samples from six on-Site monitoring wells during the Remedial Investigation (RI) for the V&M Site. Results indicated a decrease in detection of inorganic analytes in the groundwater, coinciding with the completion of the soil removal action. The decrease in levels of inorganics indicated the successful removal of contaminated soil, the source of groundwater contamination. Round 4 sample results were all below drinking water standards.

On September 29, 2000, EPA issued a Record of Decision, selecting No Further Action as the remedy for the Site. It was determined that site-related groundwater contamination does not pose a significant threat to human health or the environment; therefore, remediation is not necessary.

The EPA, with concurrence of the Commonwealth of Puerto Rico, has determined that all appropriate responses under CERCLA have been completed, and that no further response actions under CERCLA are necessary. Therefore, EPA is deleting the Site from the NPL.

List of Subjects in 40 CFR Part 300

Environmental protection, Air pollution control, Chemicals, Hazardous waste, Hazardous substances, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements, Superfund, Water pollution control, Water supply.

Dated: August 2, 2001.

William J. Muszynski,
Acting Regional Administrator, U.S. EPA, Region II.

For the reasons set out in this document 40 CFR part 300 is amended as follows:

PART 300—[AMENDED]

The authority citation for part 300 continues to read as follows:

Authority: 33 U.S.C. 1321(c)(2); 42 U.S.C. 9601–9675; E.O. 12777, 56 FR 54757, 3 CFR, 1991 Comp., p. 351; E.O. 12580, 52 FR 2923, 3 CFR, 1987 Comp., p. 193.

Appendix B—[Amended]

2. Table 1 of Appendix B to part 300 is amended under Puerto Rico (PR) by removing the site name “V&M/

Albaladejo” and the city “Almirante Norte Ward”.

BILLING CODE 6560–50–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018–AE92

Endangered and Threatened Wildlife and Plants; Establishment of Nonessential Experimental Population Status for 16 Freshwater Mussels and 1 Freshwater Snail (Anthony's Riversnail) in the Free-Flowing Reach of the Tennessee River below the Wilson Dam, Colbert and Lauderdale Counties, AL; Correction

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule; correction.

SUMMARY: The Fish and Wildlife Service (Service) published in the **Federal Register** of June 14, 2001, a document concerning the establishment of nonessential experimental population status for 16 freshwater mussels and 1 freshwater snail (Anthony's Riversnail) in the free-flowing reach of the Tennessee River below the Wilson Dam, Colbert and Lauderdale Counties, AL. The “When Listed” numbers in the table of species information was inadvertently omitted in the rule. This correction amends that table to include the “When Listed” numbers.

DATES: Effective on August 21, 2001.

FOR FURTHER INFORMATION CONTACT: Dr. Renne Lohoefer at 703/358–2171; facsimile 703/358–1735; and e-mail Renne_Lohoefer@fws.gov.

SUPPLEMENTARY INFORMATION: The Service published a document in the **Federal Register** of June 14, 2001, (66 FR 32250) that inadvertently omitted the “When Listed” numbers in the table of species information provided in the rule. This correction amends the table to include the previously missing “When Listed” numbers.

The number 709 represents the “When Listed” number for each of the 16 Federally listed freshwater mussel species and the 1 Federally listed freshwater snail species. The “When Listed” numbers correspond to footnotes at the end of 50 CFR 17.11 and 17.12 that indicate the date and **Federal Register** citation of when animal and plant species were added to the “List of Endangered and Threatened Wildlife.”
