

Therefore, the Commission hereby grants Exelon Generation Company, LLC, exemption from the requirements of 10 CFR part 50, § 50.60(a) and 10 CFR part 50, appendix G, for Byron Units 1 and 2 and Braidwood Units 1 and 2.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this exemption will not have a significant effect on the quality of the human environment. The environmental assessment is published in the **Federal Register** (66 FR 38755).

This exemption is effective upon issuance.

Dated at Rockville, Maryland, this 8th day of August 2001.

For the Nuclear Regulatory Commission.

## NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-266 and 50-301]

### Nuclear Management Company, LLC; Notice of Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (Commission) has issued Amendment Nos. 201 and 206 to Facility Operating License Nos. DPR-24 and DPR-27 issued to the Nuclear Management Company, LLC (the licensee), which revised the Operating Licenses and Technical Specifications for the Point Beach Nuclear Plant, Units 1 and 2, respectively, located in Manitowoc County, Wisconsin. The amendments are effective as of the date of issuance and shall be implemented by December 31, 2001. The implementation of the amendments include two license conditions that are being added to Appendix C of the Operating Licenses.

The amendments replace, in their entirety, the current TSs (CTS) with a set of improved TSs (ITS) based on (1) NUREG-1431, Revision 1, "Standard Technical Specifications, Westinghouse Plants," dated April 1995, including subsequent approved changes to the standard TSs, (2) guidance provided in the Commission's "Final Policy Statement on Technical Specifications Improvements for Nuclear Power Reactors," published on July 22, 1993 (58 FR 39132), and (3) 10 CFR 50.36, "Technical Specifications," as amended July 19, 1995 (60 FR 36953). In addition, the amendments added two license

conditions to Appendix C of the Operating Licenses that (1) require the relocation of certain CTS requirements into licensee-controlled documents, and (2) provide the schedule for the first performance of surveillance requirements that are new or revised in the amendments.

In addition to the amendments discussed above, Amendment Nos. 201 and 206 also include the implementation of a Core Operating Limits Report (COLR), which the licensee requested to be issued concurrent with the ITS amendment. This amendment relocates cycle-specific reactor parameter limits from the TSs to a licensee-controlled document called a COLR.

Amendment Nos. 201 and 206 also include the implementation of a Pressure Temperature Limits Report (PTLR), which the licensee requested to be issued concurrent with the ITS amendment. This amendment relocates pressure-temperature curves to a licensee-controlled document called a PTLR.

The applications for amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments.

Notice of Consideration of Issuance of Amendment to Facility Operating License and Opportunity for a Hearing in connection with the action to convert to ITS was published in the **Federal Register** on June 22, 2001 (66 FR 33581). Notice of Consideration of Issuance of Amendment to Facility Operating License and Opportunity for a Hearing in connection with the action to implement a COLR was published in the **Federal Register** on August 9, 2000 (65 FR 48740). Notice of Consideration of Issuance of Amendment to Facility Operating License and Opportunity for a Hearing in connection with the action to implement a PTLR was published in the **Federal Register** on August 23, 2000 (65 FR 51364). No request for a hearing or petition for leave to intervene was filed following these notices.

The Commission has prepared an Environmental Assessment related to the action and has determined not to prepare an environmental impact statement. Based upon the environmental assessment, the Commission has concluded that the issuance of the amendment will not have a significant effect on the quality of the human environment. The

Environmental Assessment was published in the **Federal Register** on July 23, 2001 (66 FR 38329).

For further details with respect to the action see (1) the application for amendment dated November 15, 1999, as supplemented March 15, June 15, June 19, July 28, August 17, September 14, October 19 and December 21, 2000, February 6, February 23, March 19, May 11 and June 13, and July 27, 2001, (2) the application for amendment dated March 2, 2000, as supplemented August 14, 2000, (3) the application for amendment dated March 10, 2000, as supplemented November 20, 2000, and April 10, 2001, (4) Amendment No. 201 to License No. DPR-24 and Amendment No. 206 to License No. DPR-27, (5) the Commission's related Safety Evaluation, and (6) the Commission's Environmental Assessment. ## NUCLEAR REGULATORY COMMISSION

### Notice Seeking Qualified Candidates for the Advisory Committee on Nuclear Waste

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Request for resumès.

**SUMMARY:** Submit resumès to: Ms. Sherry Meador, ACRS/ACNW, Mail Stop T2E-26, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

**SUPPLEMENTARY INFORMATION:** The Commission established the Advisory Committee on Nuclear Waste (ACNW) to provide independent technical review of and advice on matters related to the management of nuclear waste, including all aspects of nuclear waste disposal facilities, as directed by the Commission. This encompasses activities related to both high- and low-level radioactive waste disposal facilities, including the licensing, operation, and closure of the facilities, rulemakings, and associated regulatory guides and technical positions developed to clarify the intent of NRC's high- and low-level waste regulations. As part of these activities, the ACNW reviews performance assessment evaluations of waste disposal facilities. Committee members are selected from a variety of engineering and scientific disciplines, such as risk assessment, chemistry, mechanical engineering, civil engineering, materials sciences, and the earth sciences. Currently, the Commission is seeking an additional individual with technical expertise in the area of health physics, dose assessment, and consequences modeling to augment the existing expertise of the 4-member committee. Committee members serve a 4 year term with the possibility of reappointment for a total service of 8 years.

Criteria used to evaluate candidates include education and experience, demonstrated skills in nuclear waste management matters, and the ability to solve complex technical problems. The Commission, in selecting its Committee members, considers the need for a specific expertise to accomplish the work expected to be before the ACNW. For this position, the expertise must be directly related to the area of health physics including dose assessment and consequence modeling. Consistent with the requirements of the Federal Advisory Committee Act, the Commission seeks candidates with diverse backgrounds, so that the membership on the Committee will be fairly balanced in terms of the points of view represented and functions to be performed by the Committee.

Candidates for ACNW appointments may be involved in or have financial interests related to NRC-regulated aspects of the nuclear industry. Because conflict-of-interest considerations may restrict the participation of ACNW members in ACNW activities, the degree and nature of any such restriction on an individual's activities as a member will be considered in the selection process. Each qualified candidate's financial interests must be reconciled with applicable Federal and NRC rules and

regulations prior to final appointment. This might require divestiture of securities or discontinuance of certain contracts or grants. Information regarding these restrictions will be provided upon request.

A resumé describing the educational and professional background of the candidate, including any special accomplishments and professional references should be provided. Candidates should provide their current address, telephone number, and e-mail address. All candidates will receive careful consideration. Appointment will be made without regard to such factors as race, color, religion, national origin, sex, age, or disabilities. Candidates must be citizens of the United States and be able to devote approximately 50–100 days per year to Committee business. Applications will be accepted until November 16, 2001.

Dated: August 14, 2001.
