

**SUPPLEMENTARY INFORMATION:** The Commission established the Advisory Committee on Nuclear Waste (ACNW) to provide independent technical review of and advice on matters related to the management of nuclear waste, including all aspects of nuclear waste disposal facilities, as directed by the Commission. This encompasses activities related to both high- and low-level radioactive waste disposal facilities, including the licensing, operation, and closure of the facilities, rulemakings, and associated regulatory guides and technical positions developed to clarify the intent of NRC's high- and low-level waste regulations. As part of these activities, the ACNW reviews performance assessment evaluations of waste disposal facilities. Committee members are selected from a variety of engineering and scientific disciplines, such as risk assessment, chemistry, mechanical engineering, civil engineering, materials sciences, and the earth sciences. Currently, the Commission is seeking an additional individual with technical expertise in the area of health physics, dose assessment, and consequences modeling to augment the existing expertise of the 4-member committee. Committee members serve a 4 year term with the possibility of reappointment for a total service of 8 years.

Criteria used to evaluate candidates include education and experience, demonstrated skills in nuclear waste management matters, and the ability to solve complex technical problems. The Commission, in selecting its Committee members, considers the need for a specific expertise to accomplish the work expected to be before the ACNW. For this position, the expertise must be directly related to the area of health physics including dose assessment and consequence modeling. Consistent with the requirements of the Federal Advisory Committee Act, the Commission seeks candidates with diverse backgrounds, so that the membership on the Committee will be fairly balanced in terms of the points of view represented and functions to be performed by the Committee.

Candidates for ACNW appointments may be involved in or have financial interests related to NRC-regulated aspects of the nuclear industry. Because conflict-of-interest considerations may restrict the participation of ACNW members in ACNW activities, the degree and nature of any such restriction on an individual's activities as a member will be considered in the selection process. Each qualified candidate's financial interests must be reconciled with applicable Federal and NRC rules and

regulations prior to final appointment. This might require divestiture of securities or discontinuance of certain contracts or grants. Information regarding these restrictions will be provided upon request.

A resumé describing the educational and professional background of the candidate, including any special accomplishments and professional references should be provided. Candidates should provide their current address, telephone number, and e-mail address. All candidates will receive careful consideration. Appointment will be made without regard to such factors as race, color, religion, national origin, sex, age, or disabilities. Candidates must be citizens of the United States and be able to devote approximately 50–100 days per year to Committee business. Applications will be accepted until November 16, 2001.

Dated: August 14, 2001.

 Part 257; SEC File No. 270-252; OMB Control No. 3235-0306

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.), the Securities and Exchange Commission (Commission) is soliciting comments on the collections of information under the Public Utility Holding Company Act of 1935 (Act) summarized below. The Commission plans to submit these existing collections of information to the Office of Management and Budget for extension and approval.

Rule 45 imposes a filing requirement on registered holding companies and their subsidiaries under Section 12(b) the Act. Under the requirement, the companies must file a declaration seeking authority to make loans or

otherwise extend credit to other companies in the same holding company system. Among others, the rule exempts from the filing requirement the performance of payment obligations under consolidated tax agreements. The 15 recordkeepers together incur about 46 annual burden hours to comply with these requirements.

Rule 52 permits public utility subsidiary companies of registered holding companies to issue and sell certain securities without filing a declaration if certain conditions are met. The purpose of collecting the information is to determine the existence of detriment to interests the Act was designed to protect. The Commission estimates that the total annual reporting and recordkeeping burden of collections under Rule 52 is 33 hours (33 responses  $\times$  one hour = 33 burden hours).

Section 32 and 33 of the Act and Rules 53, 54, and 57(b) under the Act, permit, among other things utility holding companies registered under the Act to make direct or indirect investments in exempt wholesale generators ("EWGs") and foreign utility companies ("FUCOs"), as defined in Sections 32 and 33 of the Act, respectively, without the prior approval of the Commission, if certain conditions are met. Rules 53 and 54 do not create a reporting burden for respondents. Rule 53 does, however, contain recordkeeping and retention requirements. As required by Congress, the Commission mandates the maintenance of certain books and records identifying investments in and earnings from all subsidiary EWGs or FUCOs in order to measure their financial effect on the registered systems.

The Commission estimates that the total annual recordkeeping and record retention burden under Rule 53 will be a total of 160 hours (10 hours per respondent  $\times$  16 respondents = 160 burden hours). It is estimated that there will be no burden hours associated with Rule 54.

Under Rule 57(b) there is an annual requirement for any public utility company that owns one or more FUCOs to file Form U-33-S. The information contained in Form U-33-S allows the Commission to monitor overseas investments by public utility companies.

The Commission estimates that the total annual reporting burden under Rule 57(b) will be 30 hours (3 hours per respondent  $\times$  filings = 30 hours).

Rules 53, 54, 57(b) each impose a mandatory recordkeeping requirement

of this information collection. It is mandatory that qualifying companies provide the information required by Rules 53, 54 and 57(b). There is no requirement to keep the information confidential because it is public information.

Rule 58 allows registered holding companies and their subsidiaries to acquire energy-related and gas-related companies. Acquisitions are made, within certain limits, without prior Commission approval under Section 10 of the Act. However, within sixty days after the end of the first calendar quarter in which any exempt acquisition is made, and each calendar quarter thereafter, the registered holding company is required to file with the Commission a Certificate of Notification on Form U-9C-3 containing the information prescribed by that form. The Commission uses this information to determine the existence of financial detriment, regarding the acquisition of certain energy-related companies, to the interests the Act is designed to protect. The Commission estimates that the total annual reporting burden is 1,008 hours to comply with these requirements (63 respondents  $\times$  16 = 1,008 burden hours).

Rule 71 requires that certain information be filed by employees of registered holding companies who represent the companies' interests before Congress, the Commission or the Federal Energy Regulatory Commission on either Form U-12(I)-A or Form U-12(I)-B. The filings must provide, among other things, the identity of the representative, the person's position and compensation and a quarterly statement of those expenses not incurred in the ordinary course of business. Employees appearing for the first time must file this information on form U-12(I)-A within ten days of an appearance. Employees appearing on a regular basis may file the information in advance on Form U-12(I)-B, which will remain valid for the remainder of the year in which it was first filed and for the following two calendar years. Thereafter, it may be renewed for additional three-year periods within thirty days of the expiration of the prior filing.

The information collection prescribed by Form U-12(I)-A and Form U-12(I)-B is required by Rule 71 under the Act. Rule 71 implements Section 12(i) of the Act, which expressly requires the filing of the prescribed disclosure information with the Commission in the interest of investors and consumers. The Commission estimates that the total annual reporting burden of collections under Rule 71 is 167 hours (250 responses  $\times$  forty minutes = 167 burden hours).
