

acceptability of the charge, completeness of the background material provided by the Agency, the need for additional expertise for the Committee to be able to respond to the charge, and clarifications necessary on issues identified by the Committee. Finally, the Committee will begin its discussions of each rule with the intent of formulating a plan of action to be accomplished to guide the remainder of the review.

A second meeting will be scheduled in November or December in order to allow the DWC to fully evaluate and discuss the issues and charge and to draft its recommendations to the Administrator of EPA.

(b) *Panel Development*: The SAB Panel for this review consists of the membership of the DWC, augmented by experts in the following areas: a) public health, b) epidemiology, c) drinking water treatment for microbial contamination, and d) statistical techniques for the determination of the occurrence of microbes in drinking water. The names of members of the Panel for the September 25–26 meeting will be posted on the SAB Website at [www.epa.gov/sab](http://www.epa.gov/sab) by the close of business on September 15, 2001. During its September meeting the Panel will discuss the need for additional persons to provide expertise and/or balance. Members of the public wishing to comment on the composition and balance of the /panel and/or wishing to suggest persons to be added to the Panel for the second meeting in November or December should send those comments by mail to Mr. Thomas O. Miller, Designated Federal Officer, SAB Drinking Water Committee (1400A), 1200 Pennsylvania Ave., NW, Washington, DC, 20460; by email at [miller.tom@epa.gov](mailto:miller.tom@epa.gov), or by Fax at (202) 501–0582. These comments should be sent so that they are received at the SAB no later than October 12, 2001. Nominations for additions to the Panel should be identified by name, expertise (see the four areas of expertise listed above), occupation, position, address, email address, and telephone number. In addition, a nomination should contain a short discussion of why the candidate should be added to the Panel. The nomination should also include a current resume (preferably in electronic format) that provides details on the nominee's background, experience and qualifications to address the issues before the Panel. These comments and suggestions will be considered in the SAB's decision on the final makeup of the review Panel for the November/December meeting. The final list of names for the SAB members and

consultants serving on the Panel will be posted on the SAB website by October 19, 2001.

This clarification of and invitation for public input to the SAB panel selection process is an attempt to explore and respond to recommendations in a recent report from the General Accounting Office (GAO) on the operations of the Office of the Science Advisory Board (GAO Report #GAO–01–531; see GAO Website: [www.gao.gov](http://www.gao.gov)).

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** This notice announces the availability of documents that were developed as part of EPA's pilot public participation process for making reregistration eligibility decisions for the organophosphate and certain other, non-organophosphate pesticides and for tolerance reassessments consistent with the Federal Food, Drug, and Cosmetic

Act, as amended by the Food Quality Protection Act of 1996 (FQPA). These documents are the preliminary human health and ecological fate and effects risk assessments and related documents for lindane. This notice starts a 60-day public comment period for the preliminary risk assessments.

Comments are to be limited to issues directly associated with lindane and raised by the risk assessments or other documents placed in the docket. By allowing access and opportunity for comment on preliminary risk assessments, EPA is seeking to strengthen stakeholder involvement and help ensure that our decisions under FQPA are transparent and based on the best available information. The tolerance reassessment process will ensure that the United States continues to have the safest and most abundant food supply. The Agency cautions that risk assessments at this stage are preliminary only and that further refinements of the risk assessments may be appropriate for this pesticide. These documents reflect only the work and analysis conducted as of the time they were produced and it is appropriate that, as new information becomes available and/or additional analyses are performed, the conclusions they contain may change.

**DATES:** Comments, identified by the docket control number OPP-34239 for lindane, must be received on or before October 29, 2001.

**ADDRESSES:** Comments may be submitted by mail, electronically, or in person. Please follow the detailed instructions for each method as provided in Unit I. of the

## II. Background

### A. What Action is the Agency Taking?

EPA is making available preliminary risk assessments that have been developed as part of EPA's process for making reregistration eligibility decisions for the organophosphate and other pesticides and for tolerance reassessments consistent with the FFDCA, as amended by the FQPA. The Agency's preliminary human health and ecological fate and effects risk assessments and other related documents for lindane are available in the individual pesticide dockets. As additional comments, reviews, and risk assessment modifications become available, these will also be docketed for lindane.

The Agency cautions that the lindane risk assessments are preliminary only and that further refinements may be appropriate. These documents reflect only the work and analysis conducted as of the time they were produced and it is appropriate that, as new information becomes available and/or additional analyses are performed, the conclusions they contain may change.

The Agency is providing an opportunity, through this notice, for interested parties to provide written comments and input to the Agency on the preliminary risk assessments for the chemicals specified in this notice. Such comments and input could address, for example, the availability of additional data to further refine the risk assessments, such as percent crop treated information or submission of residue data from food processing studies, or could address the Agency's risk assessment methodologies and

assumptions as applied to this specific chemical. Comments should be limited to issues raised within the preliminary risk assessments and associated documents. EPA will provide other opportunities for public comment on other science issues associated with the pesticide tolerance reassessment program. Failure to comment on any such issues as part of this opportunity will in no way prejudice or limit a commenter's opportunity to participate fully in later notice and comment processes. All comments should be submitted by October 29, 2001 using the methods in Unit I. of the **SUPPLEMENTARY INFORMATION**. Comments will become part of the Agency record for lindane.

The documents are available for review in the public dockets listed in **ADDRESSES**. We will use these documents to evaluate the CCP activities at SRS to characterize

SRS-generated contact-handled (CH) TRU debris waste during an inspection conducted the week of September 24, 2001. The purpose of the inspection is to verify that the CCP can properly characterize SRS-generated contact-handled (CH) TRU solid debris waste, consistent with the WIPP Compliance Criteria and Condition 3 of EPA's final certification decision for the WIPP.
