

range of diffuse sources (e.g., pollutant runoff from agricultural lands, stormwater flows from cities, inadequate sewage treatment, and seepage into ground water). Many of these sources contribute microbial contaminants to waterbodies and this contamination impairs the use of waters for recreational, fishing, and shellfish growing purposes and limits use of waters as a source of drinking water.

In response to growing evidence of significant microbial contamination of waters, the Office of Water has prepared a draft Strategy for Waterborne Microbial Disease. This draft Strategy describes the microbial water pollution problem and identifies four areas of concern as the primary focus of efforts to reduce water pollution and threats to public health.

EPA seeks public comment on all aspects of the draft Strategy. Examples of questions that might be addressed by the public include:

(1) Does the draft Strategy appropriately describe the water pollution problem and public health risk posed by microbial contamination?

(2) The draft Strategy emphasizes four areas of concern. Are these four areas appropriate as the focus of the draft Strategy? If not, which other areas of concern should be addressed and why?

(3) Are the actions identified to strengthen water pollution control programs appropriate? What other actions should be considered?

EPA will produce a report that will summarize the meeting as well as capture all comments and suggestions. Submitted written comments will also be included in the document.

Comments must be submitted to Ms. Harriet McCollum at Sciences, Inc., 1800 Diagonal Road, Suite 500, Alexandria, VA 22314; phone (703) 684-0123; fax (703) 684-2223, or email at hmccollum@sciences.com, by October 19, 2001.

Dated: August 15, 2001.

Acting Director, Office of Science and Technology.
