### Abstract

National Science Foundation (NSF), Division of Human Resources (HRM), as part of its Workforce Planning efforts, is reengineering its business processes. Part of this reengineering effort is devoted to making the application and referral process for both internal and external applicants easier to use, more efficient and timely. Applicants will apply on-line using a web-based resume, which will prompt them to provide pertinent personal data necessary to apply for a position.

### Proposed Project

#### Use of the Information

The information will be used by NSF to provide applicants with the ability to apply electronically for NSF positions and receive notification as to their qualifications, application dispensation and to request to be notified of future vacancies for which they may qualify.

In order to apply for vacancies, applicants will be required to submit certain data in order to receive consideration. Users only need access to the Internet for this system to work. This information will be used to determine which applicants are best qualified for a position, based on applicant responses to a series of job related "yes/no" or "multiple choice" questions. The resume portion requires applicants to provide the same information they would provide were they were submitting a paper OF-612. The obvious benefit being that the applicant may do so on-line, 24 hours a day/seven days a week and receive electronic notification about the status of their application or information on other vacancies for which they may qualify. Staff members of the Human Resource Division and the selecting official(s) for specific positions for which applicants apply are the only ones privy to the applicant data. The most significant data is not the applicant personal data such as address or phone number but rather their description of their work experience and their corresponding responses to those questions, which determine their overall rating, ranking, and referral to the selecting official.

#### Estimate of Burden

Public reporting burden for this collection of information is estimated to average less than 30 to 45 minutes to create the on line resume and
