II. Background and Explanation of Actions Being Taken

In the July 17, 2001 **Federal Register** (66 FR 37227) (FRL-6793-6), the Agency announced the July 24, 2001 Technical Briefing and an opportunity to comment on the *Bt* Crops reassessment. EPA asked that comments be submitted by August 30, 2001. In the August 10, 2001 **Federal Register** (66 FR 42220) (FRL-6791-4), the Agency announced the registration of the Cry1F

corn plant-incorporated protectant and the opening of a public docket containing the record on which EPA based this registration.

Several members of the public have asked for additional time to submit comments in response to the July 17 Notice. In addition, some members of the public have asked for additional time to comment on the Cry1F product and have asked that it be considered separately from the other products covered by the *Bt* Crops Reassessment. Although the notice of registration and materials in the public docket for Cry1F state that the Cry1F product would be reevaluated on the same schedule as other *Bt* corn products and that relevant decisions in the *Bt* Crops Reassessment would be applied to that registration, this information was not noted in the FR Notice. Thus, this notice clarifies that the Cry1F product is included within the scope of the *Bt* Crops Reassessment. Further, in light of all of the circumstances, this Notice also announces the Agency's decision to provide additional time to comment for all *Bt* corn and cotton products with expiring registrations.

Several members of the public have also asked in a letter dated July 23, 2001, for an extension because a portion of the data base for the *Bt* Crops Reassessment relating to the toxicity of *Bt* corn pollen to Monarch butterflies is not publicly available. While these data are still subject to a confidentiality claim that prevents public release at this time, EPA has arranged to allow the public to inspect these data in EPA reading rooms, provided that any person inspecting the data first signs a Confidentiality Agreement. See www.epa.gov/pesticides/biopesticides for more information.

In summary, the Agency is extending until September 10, 2001, the period for comment on the implications of the revised risk and benefit sections of the reassessment, the draft Potential Risk Mitigation and Regulatory Options paper, and the regulatory decisions on the *Bacillus thuringiensis* Cry1F protein and the genetic material necessary for its production (plasmid insert PHI8999) in corn plants.
