Approval and Promulgation of Air Quality Implementation Plans; Pennsylvania; VOC and NO_x RACT Determinations for Seven Individual Sources in the Philadelphia-Wilmington-Trenton Area

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA proposes to approve the State Implementation Plan (SIP) revisions submitted by the Commonwealth of Pennsylvania for the purpose of establishing and requiring reasonably available control technology (RACT) for seven major sources of volatile organic compounds (VOC) and/or nitrogen oxides (NO_x). These sources are located in the Philadelphia-Wilmington-Trenton ozone nonattainment area. In the Final Rules section of this **Federal Register**, EPA is approving the Commonwealth's SIP revisions as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. The rationale for the

approval is set forth in the direct final rule. If no adverse comments are received in response to this action, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period. Any parties interested in commenting must do so at this time. Please note that if adverse comment is received for a specific source or subset of sources covered by an amendment, section or paragraph of this rule, only that amendment, section, or paragraph for that source or subset of sources will be withdrawn.

Approval and Promulgation of Implementation Plans; New Jersey; Motor Vehicle Inspection and Maintenance Program

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve a State Implementation Plan (SIP) revision submitted by New Jersey. This revision consists of two elements necessary for EPA to grant final full approval of New Jersey's enhanced motor vehicle inspection and maintenance (I/M) program. The first element provides the State's final submittal for compliance with the National Highway Systems Designation Act (NHSDA), which allowed states to claim additional credit for their decentralized inspection and maintenance programs, provided they could validate that credit claim with actual program implementation data. The second element revises New Jersey's performance standard modeling to reflect the State's enhanced I/M program as it is currently implemented. This element satisfies a condition of EPA's May 14, 1997 conditional interim approval of New Jersey's enhanced I/M program SIP. The intended effect of this proposal is to approve the two evaluations of the enhanced I/M program, in addition to prior minor revisions to the enhanced I/M SIP, and to grant final full approval of the program. The enhanced I/M program will result in emission reductions that will help achieve attainment of the one-
