SUPPLEMENTARY INFORMATION:**I. Background:**

To meet many of OSHA's program needs, OSHA is proposing to continue its data initiative to collect occupational injury and illness data and information on the number of workers employed and the number of hours worked from establishments in portions of the private sector and from some state and local government agencies. OSHA will collect calendar year 2001 data from up to 139,000 employers already required to create and maintain records pursuant to 29 CFR Part 1904. These data will allow OSHA to calculate occupational injury and illness rates and to focus its efforts on individual workplaces with ongoing series safety and health problems. Successful implementation of the data collection initiative is critical to OSHA's outreach and enforcement efforts and the data requirements tied to the Government Performance and Results Act (GPRA).
