

Resource Area. The draft RMP/EIS considers and analyzes five (5) alternatives (A–E), including the No Action or Present Management alternative, with Alternative D identified as the agency's Preferred Alternative. These alternatives have been developed based on extensive public input following scoping (July 1999), review of the summary of the Analysis of the Management Situation (July 2000) and numerous meetings with local governments, tribes and the Southeast Oregon Resource Advisory Council (RAC). The alternatives provide for a wide array of alternative land use allocations and management direction. The alternatives provide for variable levels of commodity production, resource protection, and authorized land and resource uses, including utility corridors, energy and non-energy mineral leasing, livestock grazing and various forms of recreation. A final environmental impact statement and proposed Lakeview Resource Management Plan is expected to be available for public review in early 2002.

Dated: August 23, 2001.

BILLING CODE 4310-JB-P

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

American River Pump Station Project, Placer County, CA

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of availability of the Draft Environmental Impact, DES 01-26 Statement/Environmental Impact Report (Draft EIS/EIR) and notice of public hearing.

SUMMARY: The U.S. Bureau of Reclamation (Reclamation) and the Placer County Water Agency (PCWA) have made available for public review and comment the Draft EIS/EIR for the American River Pump Station Project.

The proposed project would develop a pump station and related facilities on the North Fork American River near Auburn, California. The project would allow PCWA to convey its Middle Fork Project (MFP) water entitlement to the Auburn Ravine tunnel to meet demands within its service area; eliminate safety concerns associated with the Auburn Dam bypass tunnel; restore the dewatered portion of the North Fork American River at the Auburn Dam construction site; and provide river access sites in the project area. Both facilities- and diversion-related impacts are addressed in the Draft EIS/EIR.

DATES: Submit written comments on the Draft EIS/EIR on or before November 13, 2001 at the address provided below. A public hearing will be held from 7 p.m. to 9 p.m. on October 11, 2001. Oral or written comments will be received regarding the project's environmental effects.

ADDRESSES: The public hearing will be held at the Placer County Water Agency, 144 Ferguson Road, Auburn, CA 95604.

Written comments on the Draft EIS/EIR should be addressed to Ms. Carol Brown, Surface Water Resources, Inc., 2031 Howe Avenue, Suite 110, Sacramento, California 95825.

Copies of the Draft EIS/EIR may be requested from Ms. Brown at the above address or by calling (916) 563-6360. See **SUPPLEMENTARY INFORMATION** section for locations where copies of the Draft EIS/EIR are available for public inspection.

FOR FURTHER INFORMATION CONTACT: Mr. Roderick Hall, Reclamation, at (916)

989-7279, TDD (916) 989-7285, or e-mail: rhall@mp.usbr.gov; or Mr. Brent Smith, PCWA, at (530) 823-4889, or e-mail at Bsmith@pcwa.net.

SUPPLEMENTARY INFORMATION: The Draft EIS/EIR will address facilities-related impacts including the effects of project construction and operation on fish resources, vegetation and wildlife, water quality, recreation, visual and cultural resources, land use, geology and soils, traffic and circulation, air quality, noise, and public health and worker safety. Diversion-related impacts include the effects of increased diversions from the American River and associated changes in Reclamation's operation of Central Valley Project (CVP) facilities. Project diversions therefore may directly or indirectly affect the American and Sacramento River (including the Delta) resources including water supply, fish and aquatic habitat, riparian vegetation and habitat, water quality, recreation, visual and cultural resources, and power supply. The Draft EIS/EIR also evaluates potential urban development impacts for the PCWA water service area. An evaluation of cumulative hydrologic and water service area impacts associated with reasonably foreseeable American River actions is also included.
