

Resource Area. The draft RMP/EIS considers and analyzes five (5) alternatives (A–E), including the No Action or Present Management alternative, with Alternative D identified as the agency's Preferred Alternative. These alternatives have been developed based on extensive public input following scoping (July 1999), review of the summary of the Analysis of the Management Situation (July 2000) and numerous meetings with local governments, tribes and the Southeast Oregon Resource Advisory Council (RAC). The alternatives provide for a wide array of alternative land use allocations and management direction. The alternatives provide for variable levels of commodity production, resource protection, and authorized land and resource uses, including utility corridors, energy and non-energy mineral leasing, livestock grazing and various forms of recreation. A final environmental impact statement and proposed Lakeview Resource Management Plan is expected to be available for public review in early 2002.
