Title: Data Collection to Expand the Child Nutrition Database.

OMB Number: 0584–0494.

Expiration Date: 02–2002.

Type of Request: Extension of currently approved collection.

Abstract: The development of the Child Nutrition (CN) Database, previously known as the National Nutrient Database for Child Nutrition Programs, is regulated by the United States Department of Agriculture (USDA) School Meal Initiatives for Healthy Children. This database is designed to be incorporated in USDA approved nutrition analysis software programs and provide an accurate source of nutrient data. The software allows schools participating in the National School Lunch (NSLP) and School Breakfast (SBP) Programs to analyze meals and measure the compliance of the menus to established nutrition goals and standards specified in 7 CFR 210.10 for the NSLP and 7 CFR 220.8 for the SBP. The information collection for the CN Database is conducted using an outside contractor. The CN Database needs to be updated with an extensive database of brand name or manufactured foods commonly used in school food service. The Food and Nutrition Service's contractor collects this data from the food industry to expand the CN Database. The submission of data from the food industry will be strictly voluntary, and

based on analytical, calculated, or nutrition facts label sources.

Respondents: The respondents are the manufacturers of food products for school food service.
