**POLICY JUSTIFICATION****Taipei Economic and Cultural Representative Office in the United States - AGM-65G Maverick Missiles**

The Taipei Economic and Cultural Representative Office in the United States has requested a possible sale of 40 AGM-65G Maverick missiles, 48 LAU-117 launchers, 10 training missiles, containers, adapters, spare and repair parts, support and test equipment, software support, maintenance and pilot training, publications and technical documents, U.S. Government and contractor technical assistance, and other related elements of logistics support. The estimated cost is \$18 million.

This sale is consistent with United States law and policy as expressed in Public Law 96-8.

These missiles will allow the recipient's F-16 aircraft to protect and defend its territory against amphibious assault. The AGM-65G's increased range relative to the AGM-65B will increase aircraft survivability. The recipient, which already has AGM-65B missiles in its inventory, will have no difficulty absorbing these additional missiles into its armed forces.

The proposed sale of this equipment and support will not affect the basic military balance in the region.

The principal contractor will be Raytheon Missile Systems Corporation of Tucson, Arizona. There are no offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require the assignment of U.S. Government and contractor representatives for periodic intervals to assist in the training, operation, and maintenance of the missiles.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

**Transmittal No. 01-25****Notice of Proposed Issuance of Letter of Offer  
Pursuant to Section 36(b)(1)  
of the Arms Export Control Act****Annex  
Item No. vi****(vi) Sensitivity of Technology:**

1. The AGM-65G Maverick air-to-ground missile has an overall classification of Secret. The Secret aspects of the Maverick system are tactics, information revealing its vulnerability to countermeasures, and counter-countermeasures.

2. Manuals and technical documents which are necessary for operational use and organizational maintenance have portions that are classified Confidential. Performance and operating logic of the countermeasures circuits are Secret.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that the recipient can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.
