Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No. SR-PCX-2001-05 and should be submitted by October 23, 2001.

IV. Commission's Findings and Order Granting Accelerated Approval of Proposed Rule Change

After careful review, the Commission finds that implementation of the proposed rule change on a pilot basis is consistent with the requirements of Section 6 of the Act¹² and the rules and regulations thereunder applicable to a national securities exchange.¹³ Specifically, the Commission believes that the proposal is consistent with Sections 6(b)(5) and 6(b)(8) of the Act.¹⁴ Section 6(b)(5) requires, among other things, that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to facilitate transactions in securities, to remove impediments to and perfect the mechanisms of a free and open market and a national market system, and, in general, to protect investors and the public interest.¹⁵ Section 6(b)(5) also requires that those rules not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. Section 6(b)(8) of the Act requires that the rules of an exchange not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

The proposed rule would provide for the assignment of Auto-Ex orders to Market Makers who are logged-on Auto-Ex according to the percentage of their in-person agency contracts traded in that issue (excluding Auto-Ex contracts traded) compared to all of the Market Maker in-person agency contracts traded (excluding Auto-Ex contracts) during the review period. Although the PCX's

proposal does not reward a Market Maker for improving the Exchange's displayed quotation, it does reward a Market Maker for providing liquidity to orders in the trading crowd by linking the Market Maker's percentage of Auto-Ex contracts to the percentage of agency contracts it executed in the trading crowd. The Commission finds that it is consistent with the purposes of Section 6(b)(5) of the Act for PCX to revise its Auto-Ex contract assignment method in this way. The Commission believes that, because the PCX's proposed Auto-Ex incentive system for Market Makers will more closely allocate the percentage of contracts that a particular Market Maker can receive on a single revolution of the wheel to the percentage of in-person agency contracts traded on the floor by that Market Maker, Market Makers will have a greater incentive to compete effectively for orders in the crowd. This result, in turn, should benefit investors and promote the public interest.

The Commission further finds that the proposed Auto-Ex Incentive Program, in general, does not impose any unnecessary burden on competition, consistent with Section 6(b)(8)¹⁶ of the Act. In fact, the proposed rule change should help foster competition because Auto-Ex allocations to Market Makers will be based on the number of in-person agency contracts that they execute on the floor, rather than on the same number of Auto-Ex contracts being allocated to each logged-on Market Maker during each wheel rotation. In addition, the Commission finds that the maximum assignment provision set forth in the proposed rule change, which limits the number of contracts each Market Maker can be assigned consecutively at any one time during a rotation, does not impose any unnecessary burden on competition, consistent with Section 6(b)(8)¹⁷ of the Act. This maximum assignment provision will not affect the number of contracts that each Market Maker is entitled to receive during each revolution of the Auto-Ex wheel, but only the timing of the allocation of contracts to each Market Maker. This provision ensures that each Market Maker logged-on to Auto-Ex will receive at least some contracts before Market Makers with a greater participation percentage are assigned all of their contracts in a given revolution. This provision also reduces the exposure of Market Makers to market risk by breaking up the distribution of contracts into smaller groupings.

The Commission is approving this proposal on a nine-month pilot basis, through June 25, 2002. As indicated above, the Commission anticipates that the proposed Auto-Ex Incentive Program for Market Makers will encourage Market Makers to compete effectively for order flow in the trading crowds, thus benefiting investors and promoting the public interest. The Commission, however, intends to review the Exchange's experience with its new allocation system during the course of the pilot program.

The Exchange has requested that the Commission approve this proposed rule change on an accelerated basis. The Commission notes that PCX's proposal is virtually identical to a proposed rule change by CBOE (SR-CBOE-99-40) that was approved on a nine-month pilot basis by the Commission,¹⁸ and was extended by the Commission for an additional six months and four months, respectively, in two subsequent orders.¹⁹ Thus, the proposed rule change concerns issues that previously have been the subject of a full comment period pursuant to Section 19(b) of the Act.²⁰ Accordingly, the Commission finds good cause for approving the proposed rule change (SR-PCX-2001-05) prior to the thirtieth day after the date of publication of notice thereof in the **Federal Register**.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,²¹ that the proposed rule change (SR-PCX-2001-05) is hereby approved on an accelerated basis, as a pilot program through June 25, 2002.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.²²

Margaret H. McFarland,
Deputy Secretary.
