**Proposed Data Collections Submitted for Public Comment and Recommendations**

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and

instruments, call the CDC Reports Clearance Officer on (404) 639-7090. Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Send comments to Anne O'Connor, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS-D24, Atlanta, GA 30333. Written comments should be received within 60 days of this notice.

*Proposed Project:* Survey of Consumer Reaction to Canadian-style Warning Labels of Tobacco Products—NEW—National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control (CDC). The Office on Smoking and Health (OSH), National Center for

Chronic Disease Prevention and Health Promotion, CDC proposes to conduct a national survey of young persons to assess their attitudes towards larger and more graphic cigarette warning labels, such as those currently used in Canada. Although the purpose of cigarette warning labels is to alert consumers about the health hazards of smoking, research suggests that current U.S. warnings fail to get the attention of smokers, an important first step if warnings are to have any deterrent effect. Cigarette warning labels have not changed since 1984 in the United States.

The proposed study will be conducted through implementation of a web-based survey. We propose to administer a 10 minute survey to 2000 persons 18 to 24 years of age. The survey will include images of Canadian cigarette packs with their current warning labels and questions about reactions to these warnings, including acceptability, and perceived usefulness (perceived impact on starting to smoke or deciding to quit). The results of this study will be shared with policy makers and public health officials. There is no cost to respondents other than their time.

Respondents	Number of responses	Responses respondent	Avg. burden per respondent (in hrs)	Total burden (in hrs)
Persons 18-24 years old .....	2000	1	10/60	333
Total .....				333

**Agency Information Collection Activities: Submission for OMB Review; Comment Request**

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the

Center for Medicare and Medicaid Services (CMS), Department of Health and Human Services, has submitted to the Office of Management and Budget (OMB) the following proposal for the collection of information. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy
