

1988) by examining the takings implications of the rule in accordance with the "Attorney General's Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings" issued under the executive order. This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.).

The Congressional Review Act, 5 U.S.C. 801 et seq., as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. USEPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2). This rule will be effective November 14, 2001.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by December 14, 2001. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Reporting and recordkeeping, Volatile organic compounds.

Authority: 42 U.S.C. 7401 et seq.

Dated: September 6, 2001.

David A. Ullrich,

Deputy Regional Administrator, Region 5.

For the reasons stated in the preamble, part 52, chapter I, title 40 of the Code of Federal Regulations are amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 et seq.

Subpart O—Illinois

2. Section 52.720 is amended by adding paragraph (c)(158), to read as follows:

§ 52.720 Identification of plan.

* * * * *

(c) * * *

(158) On December 16, 1997, Bharat Mathur, Chief, Bureau of Air, Illinois Environmental Protection Agency, submitted rules for a cap and trade program regulating volatile organic compound emissions in the Chicago area. By letter dated August 23, 2001, the state requested that USEPA defer rulemaking on section 205.150(e), which exempts new and modified sources obtaining offsets under the trading program from the requirements for traditional, full year offsets.

(i) Incorporation by reference.

Illinois Administrative Code, Title 35, Subtitle B, Chapter I, subchapter b, Part 205, entitled Emissions Reduction Market System, adopted November 20, 1997, effective November 25, 1997, except section 205.150(e).

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[MO 0135-1135a; FRL-7082-6]

Approval and Promulgation of Implementation Plans; State of Missouri

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA is approving a State Implementation Plan (SIP) revision submitted by the state of Missouri. This approval pertains to revisions to a rule which provide reference methods for determining data and information necessary for the enforcement of air pollution control regulations throughout Missouri. The effect of this approval is to ensure Federal enforceability of the state air program rules and to maintain consistency between the state-adopted rules and the approved SIP.

DATES: This direct final rule will be effective on December 14, 2001 unless EPA receives adverse comments by

November 14, 2001. If adverse comments are received, EPA will publish a timely withdrawal of the direct final rule in the **Federal Register** and inform the public that the rule will not take effect.

ADDRESSES: Comments may be mailed to Wayne Kaiser, Air Planning and Development Branch, 901 North 5th Street, Kansas City, Kansas 66101.

Copies of documents relative to this action are available for public inspection during normal business hours at the above-listed Region 7 location. Interested persons wanting to examine these documents should make an appointment with the office at least 24 hours in advance.

FOR FURTHER INFORMATION CONTACT:

Wayne Kaiser at (913) 551-7603.

SUPPLEMENTARY INFORMATION:

Throughout this document whenever "we," "us," or "our" is used, we mean EPA. This section provides additional information by addressing the following questions:

What Is a SIP?

What Is the Federal Approval Process for a SIP?

What Does Federal Approval of a State Regulation Mean to Me?

What Is Being Addressed in This Action?

Have the Requirements for Approval of a SIP Revision Been Met?

What Action Is EPA Taking?

What Is a SIP?

Section 110 of the Clean Air Act (CAA) requires states to develop air pollution regulations and control strategies to ensure that state air quality meets the national ambient air quality standards established by EPA. These ambient standards are established under section 109 of the CAA, and they currently address six criteria pollutants. These pollutants are: Carbon monoxide, nitrogen dioxide, ozone, lead, particulate matter, and sulfur dioxide.

Each state must submit these regulations and control strategies to EPA for approval and incorporation into the Federally enforceable SIP.

Each Federally approved SIP protects air quality primarily by addressing air pollution at its point of origin. These SIPs can be extensive, containing state regulations or other enforceable documents and supporting information such as emission inventories, monitoring networks, and modeling demonstrations.

What Is the Federal Approval Process for a SIP?

In order for state regulations to be incorporated into the Federally enforceable SIP, states must formally adopt the regulations and control

strategies consistent with state and Federal requirements. This process generally includes a public notice, public hearing, public comment period, and a formal adoption by a state-authorized rulemaking body.

Once a state rule, regulation, or control strategy is adopted, the state submits it to us for inclusion into the SIP. We must provide public notice and seek additional public comment regarding the proposed Federal action on the state submission. If adverse comments are received, they must be addressed prior to any final Federal action by us.

All state regulations and supporting information approved by EPA under section 110 of the CAA are incorporated into the Federally approved SIP. Records of such SIP actions are maintained in the Code of Federal Regulations (CFR) at Title 40, part 52, entitled "Approval and Promulgation of Implementation Plans." The actual state regulations which are approved are not reproduced in their entirety in the CFR outright but are "incorporated by reference," which means that we have approved a given state regulation with a specific effective date.

What Does Federal Approval of a State Regulation Mean to Me?

Enforcement of the state regulation before and after it is incorporated into the Federally approved SIP is primarily a state responsibility. However, after the regulation is Federally approved, we are authorized to take enforcement action against violators. Citizens are also offered legal recourse to address violations as described in section 304 of the CAA.

What Is Being Addressed in This Document?

On July 24, 2001, we received a request from the Missouri Department of Natural Resources to approve as a SIP revision amendments to rule 10 CSR 10-6.040, "Reference Methods." This rule generally provides reference methods for determining data and information necessary for the enforcement of air pollution control regulations throughout Missouri. It also provides reference methods for determining concentrations of criteria and non-criteria (e.g., hydrogen sulfide) pollutants in the ambient air. The latter reference methods relate to determination of compliance with 10 CSR 10-6.010, the ambient air quality standards. These standards are part of the Missouri SIP because of their relationship to implementation of the Missouri air permits program.

In this rule update, the state has revised three sections of the rule to adopt more current EPA methods. The sections revised include: Section (5), which pertains to updating how the concentration of hydrogen sulfide in ambient air will be determined; section (6), which pertains to how the concentration of sulfuric acid mist in ambient air will be determined; and section (7), which pertains to how the percent sulfur in liquid hydrocarbons will be determined.

This rule was adopted by the Missouri Air Conservation Commission on March 29, 2001, and became state effective on July 30, 2001.

Have the Requirements for Approval of a SIP Revision Been Met?

The state submittal has met the public notice requirements for SIP submissions in accordance with 40 CFR 51.102. The submittal also satisfied the completeness criteria of 40 CFR part 51, appendix V. In addition, as explained above and in more detail in the technical support document which is part of this document, the revision meets the substantive SIP requirements of the CAA, including section 110 and implementing regulations.

What Action Is EPA Taking?

We are processing this action as a final action because the revisions make routine changes to the existing rules, which are noncontroversial. Therefore, we do not anticipate any adverse comments.

Administrative Requirements

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001). This action merely approves state law as meeting Federal requirements and imposes no additional requirements beyond those imposed by state law. Accordingly, the Administrator certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). Because this rule approves pre-existing requirements under state law and does not impose any additional enforceable duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the

Unfunded Mandates Reform Act of 1995 (Public Law 104-4).

This rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000). This action also does not have Federalism implications because it does not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). This action merely approves a state rule implementing a Federal standard, and does not alter the relationship or the distribution of power and responsibilities established in the CAA. This rule also is not subject to Executive Order 13045 "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997), because it is not economically significant.

In reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a SIP submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a SIP submission, to use VCS in place of a SIP submission that otherwise satisfies the provisions of the CAA. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.).

The Congressional Review Act, 5 U.S.C. section 801 et seq., as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in

the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. section 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by December 14, 2001. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of

such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects 40 CFR Part 52

Environmental protection, Air pollution control, Hydrocarbons, Incorporation by reference, Intergovernmental relations, Reporting and recordkeeping requirements, Sulfur.

Dated: October 1, 2001.

William Rice,

Acting Regional Administrator, Region 7.

Chapter I, title 40 of the Code of Federal Regulations is amended as follows:

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 63

[FRL-7083-6]

RIN 2050-AE89

NESHAP: Standards for Hazardous Air Pollutants for Hazardous Waste Combustors

AGENCY: Environmental Protection Agency (EPA).

ACTION: Partial withdrawal of direct final rule.

SUMMARY: On July 3, 2001, EPA promulgated amendments to the regulations for hazardous waste burning cement kilns, lightweight aggregate kilns, and incinerators promulgated on September 30, 1999 (NESHAP: Final Standards for Hazardous Air Pollutants for Hazardous Waste Combustors). 66 FR 35087. EPA promulgated these amendments as direct final rules, with

an accompanying proposed rule to supplant these rules in the event EPA received any adverse comment on the amendments. 66 FR 35124. Because we received adverse comments on some of the provisions, we are withdrawing the corresponding parts of that direct final rule.

DATES: As of October 15, 2001, EPA withdraws the amendments to § 63.1206(b)(6)(i), § 63.1206(b)(7)(i)(B), § 63.1206(b)(7)(ii)(B), § 63.1206(b)(13)(i), § 63.1206(c)(7)(ii), § 63.1207(c)(2)(i), § 63.1207(f)(1)(ii), and to add the definition of "Preheater tower combustion gas monitoring location" to § 63.1201(a) published at 66 FR 35087 on July 3, 2001.

FOR FURTHER INFORMATION CONTACT: For general information, call the RCRA Call Center at 1-800-424-9346 or TDD 1-800-553-7672 (hearing impaired). Callers within the Washington Metropolitan Area must dial 703-412-9810 or TDD 703-412-3323 (hearing impaired). The RCRA Call Center is open Monday-Friday, 9 am to 4 pm, Eastern Standard Time. For more information on specific aspects of this withdrawal notice, contact Mr. Frank Behan at 703-308-8476,

behan.frank@epa.gov, or write him at the Office of Solid Waste, 5302W, U.S. EPA, Ariel Rios Building, 1200 Pennsylvania Avenue, NW, Washington, D.C. 20460.

SUPPLEMENTARY INFORMATION: On July 3, 2001, EPA published a direct final rule (66 FR 35087) and a notice of proposed rulemaking (66 FR 35124) promulgating and proposing amendments to provisions dealing largely with rules affecting implementation of the National Emission Standards for Hazardous Waste Combustors (subpart EEE of Part 63). EPA indicated that it was promulgating these amendments as direct final rules because it believed the amendments to be non-controversial. See 66 FR at 35088. However, the Agency further stated that if we received adverse comment by August 17, 2001 on one or more distinct provisions of the direct final rule, we would publish a timely withdrawal of those distinct provisions in the **Federal Register**, and deal with those provisions as proposed rules. We subsequently received adverse comment on four of the provisions: the
