The public, as well as Federal, State, and local agencies are encouraged to participate in the scoping process by submitting data, information, and comments identifying relevant environmental and socioeconomic issues to be addressed in the environmental analysis. Useful information includes other environmental studies, published and unpublished data, alternatives that should be addressed in the analysis, and potential mitigation measures associated with the proposed action.

A public scoping meeting will be held in conjunction with the local sponsor to discuss the project scope and invite public participation in developing alternatives for the project. Individuals and agencies may offer information or data relevant to the environmental socioeconomic impacts by attending the public scoping meeting, or by mailing the information to the above address.
