FOR FURTHER INFORMATION CONTACT: Steve Alcorn, 775-882-3436, or Tom Strekal, 775-887-3500.

SUPPLEMENTARY INFORMATION: On October 10, 1996, DOJ, EPA, and DOI joined NDEP, Washoe County, Reno, Sparks, and the Tribe in signing WQSA. This agreement resulted in dismissal of litigation brought by the Tribe against Reno, Sparks, the State of Nevada, and the United States over approval and operation of the Truckee Meadows Wastewater Reclamation Facility (TMWRF), owned jointly by Reno and Sparks. WQSA establishes a joint program to improve Truckee River water quality by increasing flows in the river through the purchase and dedication of Truckee River water rights for instream flow. WQSA also provides for the use of treatment plant effluent in place of river water for certain purposes.

WQSA grew from negotiations among the signatory parties during 1994-1995 to resolve litigation in a mutually agreeable manner. DOI, EPA, NDEP, and the Tribe had concerns about the quality and quantity of water in the lower Truckee River downstream from Reno and Sparks, as well as the water flowing to Pyramid Lake. Reno, Sparks, and Washoe County were concerned about those issues as well, but were primarily focused on securing permits to expand TMWRF while achieving water quality standards in the Truckee River with their discharge. Public scoping meetings for this project were held in Reno, Carson City, Fallon and Fernley, Nevada, in September 1995, and in Reno, Fallon and Fernley, Nevada, in March 1997.

Non-point sources of water pollution, such as agricultural return flows and urban runoff, as well as point sources, such as effluent from TMWRF, affect Truckee River water quality. Violations of the Federal Clean Water Act's dissolved oxygen standard (minimum of 5 mg/l) occur in the lower river as a consequence of algae production
