SUPPLEMENTARY INFORMATION:**Background**

The Black Lung Benefits Act of 1977, as amended, 30 U.S.C. 901 et. seq., provides for the payment of benefits to coal miners who have contracted black

lung disease as a result of coal mine employment, and their dependents and survivors. When a miner applies for benefits, the Division of Coal Mine Workers' Compensation (DCMWC) is required to schedule a series of diagnostic tests to help establish eligibility for black lung benefits. Each of the diagnostic tests has its own form setting forth the medical results. The forms are: CM-907, Report of Ventilatory Study; CM-2907, Report of Ventilatory Study; CM-933, Roentgenographic Interpretation Form; CM-933b, Roentgenographic Quality Rereading; CM-988, Medical History and Examination for Coal Mine Worker's Pneumoconiosis; and CM-1159, Report of Arterial Blood Gas Study.

II. Review Focus

The Department of Labor is particularly interested in comments which:

- * Evaluate whether the proposed collection of information is necessary

for the proper performance of the functions of the agency, including whether the information will have practical utility;

- * Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- * Enhance the quality, utility and clarity of the information to be collected; and
- * Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

III. Current Actions

The Department of Labor seeks the approval of the extension of this information collection in order to carry out its responsibility to determine

eligibility for black lung benefits. The CM-2907 is a new form designed to apply to all claims filed after January 20, 2001.
