The Proposal

The FAA proposes to amend 14 CFR part 71 by revoking Class E airspace at Umiat, AK. The intended effect of this proposal is the removal of the Class E controlled airspace for IFR operations at Umiat, AK.

The Umiat airport does not have a standard instrument approach

procedure, it is unattended, and does not meet the requirements to be used as an IFR alternate. The Colored Federal Airway Amber 4 (A–4) was realigned and Colored Federal Airway Amber 6 (A–6) was revoked on December 3, 1998 [63 FR 53279 5 Oct 1998 Airspace Docket 98–AAL–6] in conjunction with the removal of the Umiat Nondirectional Radio Beacon (NDB). The Umiat NDB was decommissioned in October 1999 resulting in the loss of the instrument approach procedure. With the subsequent cancellation of the A–Paid weather observer contract, there are now no aviation weather sources at Umiat, AK. Thus, the Umiat airport does not qualify for Class E airspace.

The area would be depicted on aeronautical charts for pilot reference. The coordinates for this airspace docket are based on North American Datum 83. The Class E airspace areas designated as 700/1200 foot transition areas are published in paragraph 6005 in FAA Order 7400.9J, *Airspace Designations and Reporting Points*, dated September 1, 2001, and effective September 16, 2001, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore —(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The Proposal

The FAA is considering an amendment to 14 CFR part 71 by establishing a Class E airspace area at Kayenta, AZ. The establishment of a Special RNAV (GPS) RWY 02 SIAP, RNAV (GPS) RWY 20 SIAP, and a NDB SIAP at Bedard Field has made this proposal necessary. Additional controlled airspace extending upward from 700 feet above the surface is needed to contain aircraft executing the Special RNAV (GPS) RWY 02 SIAP, RNAV (GPS) RWY 20 SIAP, and NDB SIAP to Bedard Field. The intended effect of this proposal is to provide adequate controlled airspace for aircraft executing the Special RNAV (GPS) RWY 02 SIAP, RNAV (GPS) 20 SIAP, and NDB SIAP to Bedard Field, Kayenta, AZ. Class E airspace designations are published in paragraph 6005 of FAA Order 7400.9J dated September 1, 2001, and effective September 16, 2001, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in this Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation—(1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule
