

150 hours per sponsor. Using this hour figure as our best estimate, total sponsor hours spent per year on proposal development for Project XL are estimated to be between 1,500 (10 proposals) and 3,750 (25 proposals).

The RFF study found that Project XL proposal development cost the EPA regional offices, our proxy for total EPA cost, an average of \$11,339 per proposal. Using this cost figure as our best estimate, total EPA costs per year for proposal development for Project XL are estimated to be between \$113,390 (10 proposals) and \$283,475 (25 proposals).

Bottom line respondent costs for proposal solicitation and development are estimated to range between \$646,370 and \$1,615,925 per year. Bottom line EPA costs for processing specific proposals and supporting proposal development are estimated at between \$113,390 and \$283,475 per year. It should be noted that these estimates are probably on the high end of the true average cost of proposal development and submission. As the RFF study notes, due to several efforts and steps undertaken by EPA to better facilitate and streamline the proposal development and submission process, proposal development costs may be lower now than when the respondents were surveyed for the 2000 report.

No capital or start-up costs will be associated with this effort.
