

enforcement, the product transfer document (PTD), that accompanies a shipment of gasoline containing ethanol, is required by regulation to contain a legible and conspicuous statement that the gasoline contains ethanol and the percentage concentration of ethanol. This is intended to deter the mixing within the distribution system, particularly in retail storage tanks, of gasoline which contains ethanol with gasoline which does not contain ethanol. Such mixing would likely result in a gasoline with an ethanol concentration of less than 9 volume percent but with an RVP above the standard. Parties wishing a testing exemption must submit certain information to EPA. EPA estimates that 3,000,000 PTDs are generated annually for gasoline blended with ethanol. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on July 3, 2001 (66 FR 35239). No comments were received.

Burden Statement: The annual public reporting and record keeping burden for this collection of information is estimated to average 5 seconds per response. Burden means the total time, effort or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Refiners, Blenders, and Importers of gasoline blended with ethanol.

Estimated Number of Respondents: 1,000.

Frequency of Response: Daily.

Estimated Total Annual Hour Burden: 4,178 hours.

Abstract: All data in this ICR that is recorded and reported is required by 40 CFR part 60 subpart VVV. The monitoring and record keeping requirements include: maintain records of startups, shutdowns, malfunctions, periods where the continuous monitoring system is inoperative (60.7(b)), and of all measurements including performance test measurements, operating parameters of monitoring device results for catalytic or thermal incinerator, carbon adsorption system, condensation system, vapor capture system and/or total enclosure (60.744(c–h)); and monitor actual 12-month volatile organic compounds (VOC) use and make semi-annual estimate of projected VOC use, if affected facility uses less than 95 Mg/year of VOC or is subject to provisions specified in 60.742(c)(3) and other information required by this part recorded in a permanent file suitable for inspection. The file shall be retained for at least two years.

Following notification of startup, the reviewing authority might inspect the

source to check if the pollution control devices are properly installed and operated.
