21 CFR Part 558

New Animal Drugs for Use in Animal Feeds; Arsanilic Acid; Technical Amendment

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule; technical amendment.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect the dose range of arsanilic acid for Type C medicated poultry feeds reported by the National Academy of Sciences/National Research Council (NAS/NRC) Drug Efficacy Study in 1972. This action is being taken to improve the accuracy of the regulations.

DATES: This rule is effective November 19, 2001.

FOR FURTHER INFORMATION CONTACT: Dianne T. McRae, Center for Veterinary Medicine (HFV–102), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–827–0212, e-mail: *dmcrae@cvm.fda.gov.*

SUPPLEMENTARY INFORMATION: FDA has found that the animal drug regulations do not reflect the dose range of arsanilic acid for Type C medicated poultry feeds reported to the agency by the NAS/NRC Drug Efficacy Study in 1972. At this time, the regulations are being amended in 21 CFR 558.62 to reflect a dose range of 45 to 90 grams per ton of medicated poultry feed.

Publication of this document constitutes final action on these changes under the Administrative Procedure Act (5 U.S.C. 553). Notice and public procedure are unnecessary because FDA is merely correcting nonsubstantive errors.

This rule does not meet the definition of ''rule'' in 5 U.S.C. 804(3)(A) because it is a rule of ''particular applicability.'' Therefore, it is not subject to the congressional review requirements in 5 U.S.C. 801–808.
