DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Intent To Prepare an Environmental Impact Statement for the Special Resource Study on the Lincoln Highway Between New York and California

AGENCY: National Park Service, Interior.

SUMMARY: Under provisions of the National Environmental Policy Act of 1969, the National Park Service (NPS) is preparing an environmental impact statement (EIS) for the special resource study (SRS) on the Lincoln Highway (Highway) between New York and California. The purpose of the study is to investigate methods to preserve the historical significance of the highway and the role it played in American popular culture, and to determine the degree and kind of federal actions (if any) necessary to achieve such preservation. The study is being prepared pursuant to Pub. L. 106-563.

To facilitate sound planning and environmental assessment, the NPS intends to gather information necessary for the preparation of the EIS, and to obtain suggestions and information from other agencies and the public on the scope of issues to be addressed in the EIS. Comments and participation in this scoping process are invited.

ADDRESSES: Written comments and information concerning preparation of the SRS/EIS or issues to be addressed in the SRS/EIS should be sent to Ruth Heikkinen, Project Leader, National Park Service, Midwest Regional Office, 1709 Jackson Street, Omaha, Nebraska 68102, *ruth—heikkinen@nps.gov*.

DATES: Any comments on the scope of issues to be addressed in the EIS should be received no later than February 15, 2002.

FOR FURTHER INFORMATION CONTACT: Ruth Heikkinen at the address above or at telephone 402-221-7285. Direct requests to be added to the project mailing list to the same address.

SUPPLEMENTARY INFORMATION: The SRS/EIS will address a range of alternatives including potential roles for the NPS in preservation and interpretation of resources and stories related to the

Lincoln Highway. In summary, the SRS will present findings on five topics:

(1) Determination of the national significance of the Lincoln Highway and associated resources;

(2) Determination of the suitability of the Highway and related resources to be included within the National Park System in relation to other sites of the same theme;

(3) Determination of feasibility for the NPS to own, manage, or participate in the conservation and interpretation of resources related to the Highway;

(4) Determination of the need for NPS management of any resources;

(5) Identification of alternatives for any potential role for the NPS in the future.

The EIS will assess the impacts of the alternatives for NPS participation. The responsible federal official is Mr. William Schenk, Regional Director, Midwest Region, National Park Service.

Our practice is to make comments, including names and addresses of respondents, available for public review. If you wish for us to withhold your name and/or address, you must state this prominently at the beginning of your comment. We will honor the request to the extent allowable by law. We are not required to consider anonymous comments. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials or organizations or businesses, available for public inspection in their entirety.

Dated: October 24, 2001.

William W. Schenk,

Regional Director.

BILLING CODE 4310-70-P

DEPARTMENT OF THE INTERIOR**National Park Service**

**Notice of Inventory Completion for
Native American Human Remains and
Associated Funerary Objects in the
Possession of the Anchorage Museum
of History and Art, Anchorage, AK, and
in the Control of the U.S. Department
of the Interior, Fish and Wildlife
Service, Region 7 Alaska Regional
Office, Anchorage, AK**

AGENCY: National Park Service, Interior.
ACTION: Notice.

Notice is hereby given in accordance
with provisions of the Native American
Graves Protection and Repatriation Act
(NAGPRA), 433 CFR 10.9, of the
completion of an inventory of human
remains and associated funerary objects
in the possession of the Anchorage
Museum of History and Art, Anchorage,
AK, and in the control of the U.S.
Department of the Interior, Fish and
Wildlife Service, Region 7 Alaska
Regional Office, Anchorage, AK.

This notice is published as part of the
National Park Service's administrative
responsibilities under NAGPRA, 43 CFR
10.2(2). The determination within this
notice are the sole responsibility of the
museum, institution, or Federal agency
that has control of these Native
American human remains and
associated funerary objects. The
National Park Service is not responsible
for the determinations within this
notice.

A detailed assessment of the human
remains was made by Anchorage
Museum of History and Art and
Aleutian/Prifilof Islands Association,
Inc., professional staff in consultation
with representatives of the Native
Village of Niolski (IRA) and Chaluka
Corporation for the native village of
Nikolski, Umnak Island, Alaska.

In 1936 or 1938, human remains
representing one individual were
collected from a burial cave on Kagamil
Island, AK, in what was then the
Aleutian Islands Refuge, and is now the
Aleutian Islands Unit of the Alaska
Maritime National Wildlife Refuge, by
Alan C. May, a member of an authorized
Smithsonian Institution expedition to
the Aleutian and Commander Islands

the direction of Dr. Ales Hrdicka.
Expedition members often made
personal collections after Dr. Hrdicka
selected items for the Smithsonian
collections. In 1983, Mr. May donated
the collection to the Anchorage Museum
of History and Art. The human remains
and associated funerary objects from
Kagamil Island in the Anchorage
Museum of History and Art are
associated with a much larger collection
of human remains and funerary objects
from Kagamil Island saves assembled by
Dr. Hrdicka during the 1936 and 1938
expeditions; this larger collection is in
the control of the National Museum of
Natural History, Smithsonian
Institution, Washington, DC. No known
individual was identified. The 126
associated funerary objects are 64
basketry fragments (some include
feathers), 2 birdskin garments, 1 mukluk
fragment, 1 bentwood dish, 3 wooden
bowls, 2 wooden container fragments, 9
unidentified wood items (some include
cordage, sinew, twine, skin, and hair), 4
stone abraders, 1 miniature yo-yo, 26
rapes, 5 lines, 2 grass bundles, 4 fur/
skin strips and fur fragments, 1 set of
bird wings, and 1 possible baleen item.

There are no radiocarbon dates for
any of the Kagamil Island cave
collections. The consensus among
anthropologists, however, is that the
collections date to the Late Prehistoric
period, possibly no earlier than 500-
1000 B.P. The Aleut practice of cave
burials existed into the Protohistoric
period in the Aleutian Islands but was
not practiced after circa A.D. 1760,
During the Russian and American
periods, explorers, priest and others
recorded Aleut knowledge about burial
cave practices and Aleut beliefs about
burial sites.

The present-day Aleut cultural
affiliation with prehistoric populations
is evident in the cultural continuity of
artifact assemblage content and artifact
form throughout the Aleutian region
since the earliest occupation 8700 B.P.
Biological data indicate in situ
development of Palco-Aleuts to Neo-
Aleuts after the Aleut-Eskimo linguistic
stock divergence some 9000 years B.P.
Glottochronological evidence indicates
that the Aleut language diverged from
Eskimoid languages between 4000 and
4600 B.P.

In the 1790s, the Aleut villages of the
Islands of the Four Mountains, which
includes Kagamil Island, and Aleut
villages of western Umnak Island were
at war. At the end of that conflict, the
remaining villagers from the Islands of
the Four Mountains were moved by the
Russian skipper Sarychev to villages in
western Umnak Island, During the 19th
century those villages consolidated into
