Description: Section 24(a) of the Occupational Safety and Health Act of 1970 states that "the Secretary shall compile accurate statistics on work injuries and illnesses which shall include all disabling, serious, or significant injuries and illnesses * * *." The Secretary of Labor has delegated this responsibility to the Bureau of Labor Statistics.

The Census of Fatal Occupational Injuries (CFOI) provides policy makers and the public with comprehensive, verifiable, and timely measures of fatal work injuries. Data are compiled from various Federal, State, and local sources and include information on how the incident occurred as well as various characteristics of the employer and the deceased worker. The information is used of surveillance of fatal work injuries and for developing prevention strategies. Data are uniformly coded by States and electronically transmitted to BLS for validation of coding and publication of results. If this information were not collected, the confusion over the number and patterns in fatal occupational injuries would continue, thus hampering prevention efforts. Collecting data using a single data source and without verification of work-relationship would compromise the integrity of CFOI data.

SUPPLEMENTARY INFORMATION: The Bureau of International Labor Affairs (ILAB), U.S. Department of Labor (USDOL, Department, or Grantor), announces the availability of funds to be granted by cooperative agreement to one or more qualifying organizations for the purpose of preventing and combating the worst forms of child labor through basic education in El Salvador, Nepal and Tanzania. The cooperative agreement(s) is(are) to be actively managed by ILAB's International Child Labor Program (ICLP), to assure achievement of the stated goals. Applicants are encouraged to be creative in proposing cost-effective interventions that will have a demonstrable impact in using education as a means of reducing the worst forms of child labor in these countries.

I. Background and Program Scope

A. USDOL Support of the Global Elimination of Child Labor

The International Labor Organization estimates that there are 250 million working children between the ages of five and 14 in developing countries, about half of whom work full-time. Full-time child workers are generally unable to attend school, and from an early age part-time child laborers must balance economic survival with schooling, often to the detriment of their education.

The existence of child labor has many implications for a country. Education is a key investment that has been linked to the acceleration of a nation's productivity and socioeconomic development. Poorly educated workers tend to earn less, live in poverty, and may need to send their own children to work at a young age. It is important to undertake education initiatives for child laborers and their at-risk siblings because their lack of schooling hinders the development of a modern workforce, overall labor market reform, poverty reduction and social progress.

Since 1995 as mandated by the U.S. Congress, USDOL has supported a worldwide technical assistance program implemented by the International Labor Organization's International Program on the Elimination of Child Labor (ILO/IPEC). USDOL contributions to date to
