SUPPLEMENTARY INFORMATION:

Title: Form MMS-131, Performance Measures Data.

OMB Control Number: 1010-0112.

Abstract: The Outer Continental Shelf (OCS) Lands Act (43 U.S.C. 1331 *et seq.*), as amended, requires the Secretary of the Interior to preserve, protect, and develop OCS oil, gas, and sulphur resources; make such resources available to meet the Nation's energy needs as rapidly as possible; balance orderly energy resource development with protection of the human, marine,

and coastal environments; ensure the public a fair and equitable return on the resources of the OCS; and preserve and maintain free enterprise competition. These responsibilities are among those delegated to MMS. MMS generally issues regulations to ensure that operations in the OCS will meet statutory requirements; provide for safety and protect the environment; and result in diligent exploration, development, and production of OCS leases.

In 1991 MMS began promoting, on a voluntary basis, the implementation of a comprehensive Safety and Environmental Management Program (SEMP) for the offshore oil and gas industry as a complement to current regulatory efforts to protect people and the environment during OCS oil and gas exploration and production activities. From the beginning, MMS, the industry as a whole, and individual companies realized that at some point they would want to know the effect of SEM on safety and environmental management of the OCS. The natural consequence of this interest was the establishment of performance measures. We are requesting OMB approval for a routine renewal of the form MMS-131, Performance Measures Data. There are a few editorial changes, but no changes to the data elements.

The responses to this collection of information are voluntary, although we consider the information to be critical for assessing the effects of the OCS Safety and Environmental Management Program. We can better focus our regulatory and research programs on areas where the performance measures indicate that operators are having difficulty meeting MMS expectations. We are more effective in leveraging resources by redirecting research efforts, promoting appropriate regulatory initiatives, and shifting inspection program emphasis. The performance measures give us valuable quantitative information to use in judging the reasonableness of company requests for alternative compliance or departures under 30 CFR 250.141 and 250.142. We also use the information collected to work with industry representatives to identify and request "pacesetter" companies make presentations at periodic workshops.

Knowing how the offshore operators as a group are doing and where their own company ranks provides company management with information to focus their continuous improvement efforts. This leads to more cost-effective prevention actions and, therefore, better cost containment. This information also provides offshore operators and

organizations with a credible data source to demonstrate to those outside the industry how well the industry and individual companies are doing.

No questions of a "sensitive" nature are asked, and the collection of information involves no proprietary information. We intend to release data collected on form MMS-131 only in a summary format that is not company-specific. We will protect the information according to the Freedom of Information Act (5 U.S.C. 552) and its implementing regulations (43 CFR part 2).

Frequency: The frequency is annual, with responses due during the 1st quarter of each calendar year.

Estimated Number and Description of Respondents: Approximately 100 Federal OCS oil and gas or sulphur lessees.

Estimated Annual Reporting and Recordkeeping "Hour" Burden: We estimate the public reporting burden averages 12 hours per response. This includes the time for reviewing instructions, gathering and maintaining data, and completing and reviewing the information. The total annual hour burden is estimated to be 760 hours.

Estimated Annual Reporting and Recordkeeping "Non-Hour Cost" Burden: We have identified no "non-hour cost" burden associated with form MMS-131.

Public Disclosure Statement: The PRA (44 U.S.C. 3501, *et seq.*) provides that an agency may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. Until OMB approves a collection of information, you are not obligated to respond.

Comments: Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3501, *et seq.*) requires each agency " * * * to provide notice * * * and otherwise consult with members of the public and affected agencies concerning each proposed collection of information * * *". Agencies must specifically solicit comments to: (a) Evaluate whether the proposed collection of information is necessary for the agency to perform its duties, including whether the information is useful; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) enhance the quality, usefulness, and clarity of the information to be collected; and (d) minimize the burden on the respondents, including the use of automated collection techniques or other forms of information technology.

To comply with the public consultation process, on August 16, 2001, we published a **Federal Register** notice (66 FR 43023) announcing that
