2. The action will result in authorizing small entities to furnish the service to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46-48c) in connection with the service proposed for addition to the Procurement List. Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

**SUPPLEMENTARY INFORMATION:** The  
Groundfish Oversight Committee will  
review the draft Framework Adjustment  
36 to the Northeast Multispecies Fishery  
Management Plan (FMP), including the  
Draft Supplemental Environmental  
Impact Statement (DSEIS). Management  
measures in Framework 36 are designed

to reduce fishing mortality for  
groundfish stocks consistent with  
Amendment 7 to the FMP, reduce  
regulatory discards of Gulf of Maine  
cod, extend or revise the Western Gulf  
of Maine closed area, provide access to  
Closed Area II to target yellowtail  
flounder, expand the authorized area for  
the northern shrimp fishery, allow  
access to groundfish closed areas by  
tuna purse seine vessels, and increase  
the trip limit for the Cultivator Shoals  
whiting fishery. Fishing mortality must  
be reduced for Gulf of Maine and  
Georges Bank cod to meet the objectives  
of the FMP. Most of the measures in the  
framework target these reductions.  
Measures under consideration include  
(but are not limited to) changes in  
seasonal and year round closed areas,  
increases in mesh size, restrictions on  
the deployment or use of gear, changes  
in trip limits, reductions in days-at-sea  
or restrictions on the use of days-at-sea,  
and modifications to gear to reduce  
bycatch of cod. Regulatory changes are  
also being considered for the  
recreational fishery, including increases  
in minimum size limits for cod,  
restrictions on access to closed areas,  
and area closures for recreational  
fishers. The Groundfish Oversight  
Committee will review the draft  
framework document and analysis of  
impacts, and may identify a preferred  
alternative. The recommendations of the  
Committee will be considered by the  
full Council at a meeting on December  
19, 2001. After the draft framework and  
DSEIS is approved by the Council, it  
will be available for public review and  
comment prior to the final selection of  
management measures in March 2002.  
After completing review of the draft  
Framework 36, the Committee will meet  
in a closed session to discuss  
Groundfish Advisory Panel  
applications.

Although non-emergency issues not  
contained in this agenda may come  
before this group for discussion, those  
issues may not be the subject of formal  
action during this meeting. Action will  
be restricted to those issues specifically  
listed in this notice and any issues  
arising after publication of this notice  
that require emergency action under  
section 305(c) of the Magnuson-Stevens  
Act, provided the public has been  
notified of the Council's intent to take  
final action to address the emergency.
