SUMMARY: The Bureau of the Census (Census Bureau) is conducting the 2001 Annual Surveys in the Manufacturing Area. The 2001 Annual Surveys consist of the Current Industrial Reports surveys, the Annual Survey of Manufactures, the Survey of Industrial Research and Development, and the Survey of Plant Capacity Utilization. We have determined that annual data collected from these surveys are needed to aid the efficient performance of essential governmental functions and have significant application to the needs of the public and industry. The data derived from these surveys, most of which have been conducted for many years, are not publicly available from nongovernmental or other governmental sources.

These surveys will provide continuing and timely national statistical data on manufacturing for the period between economic censuses. The next economic censuses will be conducted for the year 2002. The data collected in these surveys will be within the general scope and nature of those inquiries covered in the economic censuses.

Annual Survey of Manufactures

The Annual Survey of Manufactures collects industry statistics, such as total value of shipments, employment, payroll, workers' hours, capital expenditures, cost of materials consumed, supplemental labor costs, and so forth. This survey, while conducted on a sample basis, covers all manufacturing industries, including data on plants under construction but not yet in operation.

Survey of Industrial Research and Development

The Survey of Industrial Research and Development measures spending on research and development activities in private U.S. businesses. The Census Bureau collects and compiles this information with funding from the National Science Foundation (NSF). The NSF publishes the results in its publication series. Four data items in the survey provide interim statistics collected in the Census Bureau's Economic Censuses. These items (total company sales, total company employment, and total expenditures and Federally-funded expenditures for research and development conducted within the company) are collected on a mandatory basis under the authority of Title 13, U.S.C. Responses to all other data collected for the NSF are voluntary.

Survey of Plant Capacity Utilization

The Survey of Plant Capacity Utilization is designed to measure the use of industrial capacity. The survey collects information on actual output and estimates of potential output in terms of value of production. These data are the basis for calculating rates of utilization of full production capability and use of production capability under national emergency conditions. Notwithstanding any other provision of law, no person is required to respond to, nor shall a person be subject to a

penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act (PRA) unless that collection of information displays a current valid Office of Management and Budget (OMB) control number. In accordance with the PRA, 44 U.S.C., Chapter 45, the OMB approved the 2001 Annual Surveys under the following OMB Control Numbers: Current Industrial Reports—0607–0206, 0607–0392, 0607–0393, 0607–0395, 0607–0476, and 0607–0776; Annual Surveys of Manufactures—0607–0449; Survey of Industrial Research and Development—3145–0027; and Survey of Plant Capacity Utilization—0607–0175. We will provide copies of the form upon written request to the Director, U.S. Census Bureau, Washington, DC 20233–0001.

Based upon the foregoing, I have directed that the Annual Surveys in the Manufacturing Area be conducted for the purpose of collecting these data.

Dated: November 27, 2001.

William G. Barron, Jr.,

Acting Director, Bureau of the Census.
