On October 25, 2000, the Commission released a First Report and Order and Further Notice of Proposed Rulemaking (“Further Notice”) authorizing the Wireless Telecommunications Bureau to issue a public notice requesting additional information on the state of the market for local and advanced telecommunications services in multiple tenant environments (MTEs) eight months after the release of the Further Notice (66 FR 2322, January 11, 2001). The Commission in the Further

Notice noted that an assessment of the market “would best be guided by information that measures the current state of the market \* \* \* after a reasonable period of time has passed after the implementation of the Competitive Networks Order and the best practices proposed by the real estate industry.” On May 22, 2001, a real estate industry association released a set of best practices and a model contract for use in negotiating access agreements with carriers. In light of that development and a delay in the effective date of the new rules, the Bureau issued a public notice on June 25, 2001, postponing its request for additional information regarding the state of the market in order to allow sufficient opportunity to gauge the effects of the model access agreement, industry best practices, and Competitive Networks rules in the marketplace. Specifically, the Bureau stated its intent to issue a document on or about November 30, 2001.
