

further specifies rim construction requirements, load limits of non-pneumatic spare tires, and labeling requirements for non-pneumatic spare tires, including a required placard. Owner's manual information is required for "Use of Spare Tire". Revision of FMVSS 110 will require additional owner's manual information on the revised vehicle placard and tire information label, on revised tire labeling, and on tire safety and load limits and terminology.

FMVSS No. 205—Glazing Materials

This standard specifies requirement for all glazing material used in windshields, windows, and interior partitions of motor vehicles. Its purpose is to reduce the likelihood of lacerations and to minimize the possibility of occupants penetrating the windshield in a crash. More detailed information regarding the care and maintenance of such glazing items, as the glass-plastic windshield is required to be placed in the vehicle owner's manual.

FMVSS No. 208—Occupant Crash Protection

This standard specifies requirements for both active and passive occupant crash protection systems for passenger cars, multipurpose passenger vehicles, trucks and small buses. Certain safety features, such as air bags, or the care and maintenance of air bag systems, are required to be explained to the owner by means of the owner's manual. For example, the owner's manual must describe the vehicle's air bag system and provide precautionary information about the proper positioning of the occupants, including children. The owner's manual must also warn that no objects, such as shotguns carried in police cars, should be placed over or near the air bag covers.

FMVSS No. 210—Seat Belt Assembly Anchorages

This standard specifies requirements for seat belt assembly anchorages to ensure effective occupant restraint and to reduce the likelihood of failure in a crash. The standard requires that manufacturers place the following information in the vehicle owner's manual:

- a. an explanation that child restraints are designed to be secured by means of the vehicle's seat belts, and,
- b. a statement alerting vehicle owners that children are always safer in the rear seat.

FMVSS No. 213—Child Restraint Systems

This standard specifies requirements for child restraint systems and requires that manufacturers provide consumers with detailed information relating to child safety in air bag-equipped vehicles. The vehicle owner's manual must include information about the operation and do's and don'ts of built-in child seats.

Part 575 Section 103—Camper Loading

This standard requires that manufacturers of slide-in campers designed to fit into the cargo bed of pickup trucks affix a label to each camper that contains information relating to certification, identification and proper loading, and to provide more detailed loading information in the owner's manual of the truck.

Part 575 Section 105—Utility Vehicles

This regulation requires manufacturers of utility vehicles to alert drivers that the particular handling and maneuvering characteristics of utility vehicles require special driving practices when these vehicles are operated on paved roads. For example, the vehicle owner's manual is required to contain a discussion of vehicle design features that cause this type of vehicle to be more likely to roll over, and to include a discussion of driving practices that can reduce the risk of roll over. A statement is provided in the regulation that manufacturers shall include, in its entirety or equivalent form, in the vehicle owner's manual.
