

technology would permit the rejection of the antiquated practice and the unnecessary exposure associated with hand-held injections.

Reasons for Denial

Based on consideration of the petition and public comments, the NRC is denying the petition because it would be inconsistent with the Commission's overall program for revising its regulatory framework for the medical use of byproduct material. This framework focuses Commission regulation on those medical procedures that pose the highest risk, structures its regulations to be more risk-informed and more performance-based and significantly reduces regulatory burden in many areas, consistent with NRC's "Strategic Plan for Fiscal Year 1997—Fiscal Year 2002," cited in "Medical Use of Byproduct Material; Policy Statement; revision," 65 FR 47654 (August 2, 2000).

The amendment the petitioner seeks would be contrary to this regulatory approach by prohibiting the hand-held administration of radiopharmaceuticals by injection and/or requiring the use of a specific shield (the Angel Shield). Licensees should have the flexibility to determine what kind of syringe or vial shields to use in order to meet the requirements contained in 10 CFR 20.1101, "Radiation protection programs." This regulation requires licensees to use practical procedures and engineering controls designed to achieve doses that are ALARA (as low as reasonably achievable). In its inspection program, the NRC assesses whether licensees have complied with these requirements. Denial of this petition does not prohibit the licensee from using the "Angel Shield" or other shields, as practicable to meet these requirements. However, if this petition were granted, it would limit the flexibility of licensees to use other, including more effective, strategies to meet ALARA without additional rulemaking.

The decision to deny the petition is consistent with our performance goals. There is no impact on public health and safety, the environment, or common defense and security. Use of the requested device is not essential to limit or minimize doses to the public, workers, or patients. Public confidence should not be affected because the existing regulations require licensees to minimize doses and this decision continues to allow licensees the flexibility to use the "Angel Shield" or other strategies, as best fits their individual practices, in achieving this outcome. The decision maintains the

effectiveness, efficiency, and realism of the current regulations. Lastly, the denial decision does not impose unnecessary regulatory burden on licensees or the NRC staff, whereas granting the petition would cause undue burden by imposing prescriptive criteria on licensees.

For reasons cited in this document, the NRC denies the petition.

Dated at Rockville, Maryland, this 18th day of December, 2001.

For the Nuclear Regulatory Commission.

William D. Travers,

Executive Director for Operations.

30 CFR Part 250

RIN 1010-AC83

Oil and Gas and Sulphur Operations in the Outer Continental Shelf— Procedures for Dealing With Sustained Casing Pressure

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Extension of comment period for proposed rule.

SUMMARY: This document extends to March 9, 2002, the deadline for submitting comments on the proposed rule that describes procedures for dealing with sustained casing pressure (SCP) in oil and gas wells on the Outer Continental Shelf. The rule will codify these procedures and ensure uniform regulatory practices among MMS regional offices, and will also help ensure that lessees will continue to conduct operations in a safe manner.

DATES: We will consider all comments received by March 9, 2002, and we may not fully consider comments received after March 9, 2002.

ADDRESSES: Mail or hand-carry written comments (three copies) to the Department of the Interior; Minerals Management Service; 381 Elden Street; Mail Stop 4024; Herndon, Virginia 20170-4817; Attention: Rules Processing Team. If you wish to e-mail comments, the e-mail address is: rules.comments@MMS.gov. Reference "AC83 SCP Comments" in your e-mail subject line. Include your name and return address in your e-mail message and mark your message for return receipt.

FOR FURTHER INFORMATION CONTACT: Larry Ake, Engineering and Operations Division, at (703) 787-1559.

SUPPLEMENTARY INFORMATION: MMS was asked to extend the deadline for submitting comments on the proposed regulations revising 30 CFR 250, subpart E to describe procedures for dealing with SCP in oil and gas wells. The request stated that the complexity of the issue and the high cost to the domestic petroleum industry require careful consideration for comprehensive comments.

Public Comments Procedures: Our practice is to make comments, including names and home addresses of respondents, available for public review during regular business hours.

Individual respondents may request that we withhold their home address from the rulemaking record, which we will honor to the extent allowable by law. There may be circumstances in which we would withhold from the rulemaking record a respondent's identity, as allowable by law. If you wish us to withhold your name and/or address, you must state this prominently at the beginning of your comment. However, we will not consider anonymous comments. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public inspection in their entirety.

Dated: December 5, 2001.

John V. Mirabella,

Acting Chief, Engineering and Operations Division.

Eligibility Standards for Free Matter for the Blind and Other Physically Handicapped Persons

AGENCY: Postal Service.

ACTION: Proposed rule.

SUMMARY: The Postal Service proposes to amend the Domestic Mail Manual (DMM) to clarify and simplify the eligibility standards for free matter for the blind and other physically handicapped persons in conformance, to the extent practicable, with similar standards adopted by the Library of Congress for its National Library Service for the Blind and Physically Handicapped. This proposed rule also would require free matter mailers that
