

northward around Lake Lugert through a sparsely populated area to Lone Wolf, Oklahoma, and back. Farmrail requests relief from the requirements of Title 49 Code of Federal Regulations (CFR) 223.15 *Requirements for existing passenger cars* due to the infrequent use of the cars, the planned usage for excursion service, and the cost of installing compliant glazing. The cars are former VIA Rail Canada equipment, and have a double-pane combination of 1/4-inch thick safety glass inside and plate glass outside. This glazing system remains the standard in Canada for passenger equipment, and the petitioner believes that the operation of these cars, as equipped, would not pose a safety hazard to passengers or employees.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number (e.g., Waiver Petition Docket Number FRA-2001-9998) and must be submitted to the Docket Clerk, DOT Central Docket Management Facility, Room P1-401 (Plaza Level), 400 Seventh Street, SW., Washington, DC 20590.

Communications received within 30 days of the date of this notice will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9:00 a.m.–5:00 p.m.) at above facility. All documents in the public docket are also available for inspection and copying on the Internet at the docket facility's Web site at <http://dms.dot.gov>.

Issued in Washington, DC, on January 2, 2002.

Grady C. Cothen, Jr.,

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Petition for Waiver of Compliance

In accordance with part 211 of Title 49 Code of Federal Regulations (CFR), notice is hereby given that the Federal Railroad Administration (FRA) received a request for a waiver of compliance with certain requirements of its safety standards. The individual petition is described below, including the party seeking relief, the regulatory provisions involved, the nature of the relief being requested, and the petitioner's arguments in favor of relief.

Kansas City Southern Railway Company (KCS)

[Docket Number FRA-2001-9746]

The Kansas City Southern Railway Company (KCS) seeks a permanent waiver of compliance with the Railroad Safety Appliance Standards, 49 CFR part 231.27(b)(3) which states that the location of the end platform shall be “One (1) centered on each end of car between inner ends of handholds not more than eight (8) inches above top of center sill.” KCS has a series of 138 box cars, numbered KCS 125550 through KCS 125688, that were rebuilt in 1999. During the rebuild the end platforms were added to both ends of each car with approximately one inch off the center of the car. KCS's petition did not provide the specific “eccentricity” of the end platforms as measured from the center between inner ends of handholds. KCS believes this defect creates no unsafe conditions.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number (e.g., Waiver Petition Docket Number FRA-2001-9746) and must be submitted to the Docket Clerk, DOT Central Docket Management Facility, Room P1-401, Washington, DC 20590-0001. Communications received within 45 days of the date of this notice will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications

concerning these proceedings are available for examination during regular business hours (9 a.m.–5 p.m.) at the above facility. All documents in the public docket are also available for inspection and copying on the Internet at the docket facility's Web site at <http://dms.dot.gov>.

Petition for Waiver of Compliance

In accordance with part 211 of Title 49 Code of Federal Regulations (CFR), notice is hereby given that the Federal Railroad Administration (FRA) received a request for a waiver of compliance with certain requirements of its safety standards. The individual petition is described below, including the party seeking relief, the regulatory provisions involved, the nature of the relief being requested, and the petitioner's arguments in favor of relief.

Massachusetts Bay Transportation Authority

[Docket Number FRA-2000-8044]

Massachusetts Bay Transportation Authority (MBTA) seeks to resubmit a petition for reconsideration of a temporary waiver of compliance with the Railroad Safety Appliance Standards, 49 CFR 231.12(c)(4), which requires passenger car end handholds be securely fastened with bolts or rivets. MBTA states that the end handholds on their Bombardier and Kawasaki fleets of passenger coaches, as currently configured, are fastened with bolts to a slotted block that is welded to the end sill during the manufacturing process.

MBTA states that there are 146 Bombardier coaches in service since 1987–90 with no recorded failures, accidents, or injuries attributable to either the end handhold or the welded mounted blocks. There are 75 Kawasaki coaches that have been in service since 1990–91 and 17 in service since 1998 with no reported injuries attributable to the handhold or mounting blocks used to secure them.

MBTA reports having performed a recent inspection of both fleets, with no defects in the welds securing the
