SUPPLEMENTARY INFORMATION:

I. Abstract

As required in the reasonable and prudent measures in the Endangered Species Act, Section 7 biological opinion on the effects of the Bering Sea and Aleutian Islands and Gulf of Alaska pollock, Atka mackerel, and Pacific cod fisheries on the endangered Steller sea lions, National Marine Fisheries Service (NMFS) has implemented changes to information collected from fishery participants. Any vessel that is registered for directed fishing for Pacific cod, pollock, and Atka mackerel in the exclusive economic zone off Alaska must install a vessel monitoring system (VMS) unit and operate the VMS while directed fishing for each of the species. The VMS unit automatically transmits location information every 20 minutes. NOAA uses the information for determining vessel locations and enforcing the closure of areas of critical habitat. Participants must also fax NOAA a check-in report when a VMS unit has been installed.

The position reports are electronic and automatic. Check-in reports must be faxed.
