

potentially significant impacts that may result from the proposed project.

The potential environmental issues identified for most transmission projects include: land use, cultural resources, visual resources, sensitive plants and animals, erosion/soils, and fish and water resources. The scoping process will help identify the range of environmental issues that should be addressed in this EIS. When completed, the Draft EIS will be circulated for review and comment, and Bonneville will hold several public meetings to receive comments on the Draft EIS. Bonneville will consider and respond in the Final EIS to comments received on the Draft EIS. Bonneville's decision will be documented in a Record of Decision. The EIS will satisfy the requirements of NEPA.
