Needs and Uses: The state of the nation's numbering resources has a direct effect on the growth of competition in the telecommunications industry. The nation's numbering resources are depleting rapidly. Under the Communications Act of 1934, as amended by the Telecommunications Act of 1996, Congress granted the Federal Communications Commission

(FCC) exclusive jurisdiction over the United States' portion of the North American Numbering Plan (NANP). Consistent with this authority, the FCC adopted an audit requirement to preserve numbering resources. The purpose of the audits is to monitor telecommunications carriers' compliance with FCC rules and to verify the accuracy and validity of the numbering data submitted to the FCC. The audits will also allow the FCC to identify inefficiencies in the manner in which carriers use numbers, including excessive use of certain categories of numbers (e.g., administrative, aging, or intermediate numbers). By ensuring compliance with FCC rules and providing in-depth information, these audits will help preserve the nation's numbering resources. The FCC staff developed a standardized audit program consisting of audit procedures and guidelines, an internal control questionnaire, and a corresponding data request, for the independent auditor to follow in conducting audits. The independent auditor would conduct

audits using these tools. The audit procedures generally require the audited carrier to respond to requests for information from the independent auditor. The independent auditor will report its audit findings to the FCC. The FCC will use the audit results to determine whether the audited carriers are complying with the FCC's rules, and whether the audited carriers' numbering data submitted to the FCC, e.g., FCC Form 502, is accurate and valid.
