

in past satellite distribution proceedings. In an earlier notice, the Office determined that, as a matter of law, consideration of a distribution of the 2001 satellite royalty fees was premature. See 66 FR 54789 (October 30, 2001). Consequently, the Office stated that it would consider the PBS motion only so far as it concerns the distribution of the 2000 satellite royalty fees and only after all interested parties have been identified by filing the Notices of Intention requested herein and such parties have had an opportunity to respond to the motion. *Id.*

Parties who file Notices of Intention to Participate in this proceeding in accordance with this notice may, at this time, file comments on the PBS motion. The Copyright Office has posted the PBS motion for distribution of PBS national satellite feed royalty funds for 2000–2001 on the Copyright Office website at: (<http://www.loc.gov/copyright/carp/pbsmotion.pdf>). The motion is also available for copying in the Office of the General Counsel along with any additional responsive filings that have been filed in the Office of the General Counsel.

Comments on the Existence of Controversies. Before commencing a distribution proceeding or making a partial distribution, the Librarian of Congress must first ascertain whether a controversy exists as to the distribution of the royalty fees and the extent of those controversies. 17 U.S.C. 803(d). Therefore, any comments filed in response to the PBS motion as to the distribution of the 2000 satellite fees must address the existence and extent of any controversies at Phase I and Phase II.

In Phase I of a satellite royalty distribution, royalties are distributed to certain categories of broadcast programming that have been retransmitted by satellite carriers. The categories have traditionally been syndicated programming and movies, sports, commercial and noncommercial broadcaster-owned programming, religious programming, and music programming. The Office seeks comments as to controversies between these categories for royalty distribution.

In Phase II of a satellite royalty distribution, royalties are distributed to claimants within a program category. If a claimant anticipates a Phase II controversy, the claimant must state each program category in which he or she has an interest that has not, by the end of the comment period, been satisfied through a settlement agreement.

The Copyright Office must be advised of the existence and extent of all Phase I and Phase II controversies by the end of the comment period. It will not consider any controversies that come to its attention after the close of that period.

Schedule of CARP proceeding. Outstanding controversies concerning the distribution of 1996, 1997, 1998, and 1999 satellite royalty fees still remain. Before setting a schedule for a CARP proceeding to resolve any controversies over the distribution of the 2000 satellite royalty fees at issue in the PBS motion, the Office must first decide whether to resolve the remaining controversies in the preceding years or set these aside and focus on the distribution of the 2000 satellite royalty fees as requested by PBS. Therefore, the Office invites comments from all interested parties on whether to continue to conduct distribution proceedings in a sequential manner as has been the practice historically or to set aside the unresolved controversies in the earlier years and proceed immediately to the controversies surrounding the 2000 satellite royalty fees.

Dated: January 16, 2002.

David O. Carson,
General Counsel.

SUPPLEMENTARY INFORMATION:

Title of Collection: The Cross Site Analysis of the national Science Foundation's Local Systemic Change Through Teacher Enhancement Program (LSC).

OMB Control No.: 3145–0161.

Expiration Date of Approval: May 31, 2002.

Abstract: The National Science Foundation (NSF) requests an extension of approval of instruments to be used in the evaluation of the Local Systemic Change (LSC) through Teach Enhancement Program that were previously approved through May 2002 (OMB No. 3145–0136). The surveys are part of the ongoing data collection for the program-wide evaluation of the LSC. Each of the 72 currently funded projects administers teacher and principal questionnaires and conducts teacher interviews at appropriate times during the school year based on the program evaluation design.

These surveys have been ongoing for a number of years in LSC projects funded by NSF. The LSC program is a large-scale effort to modify the nature of teach in-service training (or professional development) provided to mathematics and science teachers in a large number of school districts across the country. Currently there are 72 projects funded at

up to \$6 million each. The database projects funded at up to \$6 million each. The database maintained by Horizon Research, Inc. for LSC is designed to provide information on the total system, both for accountability and for judging effectiveness. For example, NSF is required to report for GPRA the number of teachers receiving NSF in-service and development support. This information is gathered through this recurring study of the LSC projects.

Expected Respondents: A total of 150 teachers and 55 principals from schools in each of the 72 LSC projects, for a total of 10,800 teachers and 3,960 principals participating in the LSC program.

Burden On The Public: 3,960 hours for teachers and 990 hours for principals per year.

Dated: January 15, 2002.

Suzanne H. Plimpton,

NSF Reports Clearance Officer.
