SUPPLEMENTARY INFORMATION:

A. Background

NCUA commissioned n/e/r/a, an economics-consulting firm, to complete a study of methods to value non-maturity shares. The study has been completed and is available following the text of this Request for Comments on the NCUA website at <http://www.ncua.gov/news/draftboardactions/BAM-01-12-13-6.pdf>. Alternatively, to get to the study from the NCUA website (www.ncua.gov), select News, then Proposed Rules, then select on the page that follows, Request for Comments "The Evaluation of Credit Union Non-Maturity Deposits." It can also be obtained in hard copy by requesting it from the Office of Public and Congressional Affairs, 1775 Duke Street, Alexandria, Virginia, 22314-3428, telephone number (703) 518-6330.

NCUA believes the majority of credit unions would not be affected by the results of the n/e/r/a study, either because their interest rate risk profile is limited, or because they treat shares at par value for interest rate risk measurement purposes. This study will be most relevant to those institutions that assume non-maturity shares materially mitigate the risk of a high level of long-term assets.

Non-maturity shares include share drafts, regular shares and money market share accounts. Non-maturity shares may provide mitigation of interest rate risk to the extent they are a stable, low cost source of funds. Non-maturity shares have uncertain cash flows. This is because they have no contractual maturity and the dividends are set by the credit unions. Therefore, in interest rate risk assessment, credit unions must make assumptions on these cash flows.

NCUA in its asset liability review questionnaire provides guidance to examiners in establishing a scope for their review of a credit union's asset liability management (ALM), including assessment of interest rate risk. However, the questionnaire does not provide a framework for examiner review of non-maturity share assumptions.

The n/e/r/a study contains a comprehensive review of the literature
