

The fresh fruit retailers affected by the interim rule will be required to abide by restrictions on the interstate movement of regulated articles. They may be affected by the interim rule because fruit sold within the quarantined areas in retail stores cannot be moved outside of the quarantined areas. However, we expect any direct costs of compliance for fresh fruit retailers will be minimal.

The lawn maintenance companies affected by the interim rule will be required to perform additional sanitation measures when maintaining an area inside the quarantined areas. Lawn maintenance companies will have to clean and disinfect their equipment after grooming an area within the quarantined areas, and they must properly dispose of any clippings from plants or trees within the quarantined areas. These requirements will slightly increase costs for lawn maintenance companies affected by the interim rule.

Consideration of Alternatives

The alternative to the interim rule was to make no changes in the citrus canker regulations. We rejected this alternative because failure to quarantine portions of Hendry and Hillsborough Counties, FL, and additional portions of Broward, Collier, Dade, and Manatee Counties, FL, could result in greater economic losses for domestic citrus producers due to citrus canker.

The interim rule contained no new information collection or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 1, 20, 34, 70, 71, 72, and 73

RIN 3150–AG79

Revised Filing Requirements

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is amending its regulations to revise filing and advance notification requirements to reflect organizational changes within the NRC. The amended regulations are necessary to correct telephone numbers, eliminate duplicative filings, and to inform the public of administrative changes within the NRC.

EFFECTIVE DATE: January 25, 2002.

FOR FURTHER INFORMATION CONTACT: Carrie Brown, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, telephone (301) 415–8092, e-mail: cxb@nrc.gov.

SUPPLEMENTARY INFORMATION: The Commission's Announcement No. 108, dated December 24, 1998, announced its decision to abolish the Office for Analysis and Evaluation of Operational Data (AEOD), effective January 3, 1999. The emergency response function of AEOD was transferred to the Office of Incident Response Operations (IRO). Any future general correspondence and technical documents relating to incident response should be addressed to IRO. This final rule also corrects the telephone number for the NRC Operations Center.

In 1995 the NRC transferred responsibility for receiving advance notification of shipments of licensed materials from the Division of Industrial and Medical Nuclear Safety (IMNS) and NRC Regional Administrators to the Spent Fuel Project Office (SFPO). Future applications and reports as required under parts 72 and 73 should be addressed to the SFPO rather than IMNS or the Regional Administrators. The attached final rule will inform the public of these previous organizational changes and will eliminate duplicate filings.

Because these minor amendments only reflect organizational changes, the notice and comment provisions of the Administrative Procedures Act do not apply pursuant to 5 U.S.C. 553(b)(A). The amendment is effective on publication in the **Federal Register**. Good cause exists to dispense with the usual 30-day delay in the effective date because this amendment is of a minor and administrative nature, dealing with the NRC's organization.

Environmental Impact: Categorical Exclusion

NRC has determined that this final rule is the type of action described in categorical exclusion 10 CFR 51.22 (c)(2). Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this final rule.

Paperwork Reduction Act Statement

This final rule decreases the burden on licensees to eliminate the submittal of multiple copies of reports to the NRC Regional Administrator and the Director, Office of Nuclear Material Safety and Safeguards for 10 CFR 72.44(f) and 72.186(b). The public burden reduction for this information collection is estimated to average 0.20 hour(s) per request. Because the burden for this information collection is insignificant, Office of Management and Budget (OMB) clearance is not required. Existing requirements were approved by the Office of Management and Budget, approval number 3150–0132.

Public Protection Notification

If a means used to impose an information collection does not display a currently valid OMB control number, the NRC may not conduct or sponsor, and a person is not required to respond to, the information collection.
