Synopsis of the Third Order on Reconsideration and Order on Clarification

To implement Section 276 of the Telecommunications Act of 1996, the Commission has adopted several rules that define the relationship between PSPs and carriers in the call path in order to ensure that PSPs are adequately compensated for calls placed from payphones. In the *First Payphone Order*, 61 FR 52309, October 7, 1996, the Commission concluded that the interexchange carrier (IXC), as the primary beneficiary of payphone calls, should compensate the PSP. The Commission also recognized that a reseller lacking its own facilities does not have the ability to track calls, and that the facilities-based carrier should therefore pay compensation to the PSP. A requirement to track, or arrange for tracking of, compensable calls was also established for the underlying IXC, and the IXC was permitted to recover the cost of such tracking from the reseller. In the *Payphone Order on Reconsideration*, 61 FR 65341, December 12, 1996, the Commission modified its rules to provide that switch-based resellers (SBRs) are responsible for paying compensation directly to PSPs. In the *Coding Digit Waiver Order*, 63 FR 26497, May 13, 1998, the Common Carrier Bureau responded to PSP complaints that IXCs refused to identify SBRs by clarifying that when SBRs identified themselves to the first facilities-based IXC as responsible for paying compensation, the IXC was obligated to provide this information to the PSP.

On April 5, 2001, the Commission released the *Second Order on Reconsideration*, 66 FR 21105, April 27,

2001, which modified the payphone compensation rules. The modified rules provided that the first facilities-based IXC to which a LEC routes a coinless payphone call must (1) compensate the PSP for the completed call; (2) track or arrange for tracking of all compensable calls; and (3) send to the PSP call completion information to enable the PSP to verify the accuracy of compensation it receives for coinless, compensable calls and/or to bill the underlying facilities-based carrier. The first IXC may then seek reimbursement from the switchless or switch-based reseller ultimately responsible for the compensation.

In this *Third Order on Reconsideration and Order on Clarification*, we decline to modify the rules as established in the *Second Order on Reconsideration*. We also reaffirm that, for purposes of payphone compensation, only calls that are answered by the called party are "completed" and thus compensable. Further, we clarify that the Commission supports the preservation and establishment of direct relationships and agreements between PSPs and SBRs for tracking and payment of payphone compensation, and that the liability of the first facilities-based IXC is limited to the extent that SBRs enter into such direct relationships. We also reiterate that the Commission did not, by revising the payphone compensation rules, intend to nullify any current or future contractual arrangements. Finally, we clarify that carriers are only required to report to PSPs calls that are completed, and thus compensable.

SUPPLEMENTARY INFORMATION: 1. On October 17, 2001, the Commission released Report & Order ("*R&O*") clarifying the manner in which noncommercial educational ("NCE") television licensees may use their excess digital television ("DTV") capacity for remunerative purposes. In the Matter of Ancillary or Supplementary Use of Digital Television Capacity by Noncommercial Licensees, MM Docket No. 98-203, 66 FR 58973 (November 26, 2001). Among other things, the Commission amended § 73.621 of its rules to apply to the entire digital bitstream, including ancillary or supplementary services, thereby requiring NCE licensees to use their digital capacity primarily for a noncommercial, nonprofit, educational broadcast service. The Commission also amended §§ 73.642 (a), (b), (e) and § 73.644(a) of its rules to clarify that NCE licenses may offer subscription services on their excess digital capacity. When it amended these rules, the Commission ordered that the amended rules would "be effective the later of
